**DIELECTRICS - EMERGENCY
NOTIFICATION PROCEDURE**

H. R. Ford-1070
D. R. Hansen-1800
D. L. Mellon-1010
P. L. Slayton-1650
J. Buchanan-5080

We have in final draft an SIB dealing with notification of railcar spills involving Dielectrics. Both the day and night procedure require immediate contact with the customer. We need to establish a list for all U. S. and Canadian customers purchasing dielectric fluids in bulk.

1. 3-daytime contacts in order with numbers.
2. 3-nighttime contacts to be called in order with telephone numbers.

I would be grateful if you could call your customers and send us a complete list for each delivery point by June 1st. Please note that several of your customers have expressed concern that such a system be established rapidly so we would appreciate your timely response.

Thank you.
