Monsanto

COMPANY CONFIDENTIAL

FROM (NAME & LOCATION) E. E. Stewart, Krummrich

DATE June 21, 1972

SUBJECT PRATT/SAUGET 6/13/72
VILLAGE OF SAUGET -
REFERENCE SECONDARY TREATMENT

cc: Bill Engman
Gill Hippe
Art Leisy

TO : Mr. Paul Heisler

In the reference memo, Glenn Pratt is asking what methods will be employed that will more adequately control the Village's discharge of PCB.

Remember our strategy is to focus attention to the manufacturing department and the incinerator where a program to restrict "knowing discharges" is in effect. We also, want to reflect losses in terms of river concentration.

It is my understanding that you are not going to relate PCB to the Waste Treatment facilities. This is satisfactory and meets our strategy plan.

As you know, we have fish and should have some analyses for PCB early next week. All fish analyses should be complete about July 7. It was our plan not to get involved with the federal authorities until we have fish data in hand.
