Ethyl Gasoline Corporation,
25 Broadway,
New York, N. Y.

Gentlemen:

I noticed our mechanic burning carbon from a car in which nothing but Ethyl gasoline has been used for six months, and the operation seems very different from that of burning carbon from a motor using ordinary gasoline, in that the burning of the carbon involves a black smoke carrying with it obnoxious fumes, and I am wondering if it is injurious to the health of the mechanic, and whether there should be any sort of a gas mask used when this operation is undertaken.

I have only in mind the safety of our Garage Mechanic in making this inquiry.

Yours truly,

C. F. Braun

President,

McINTOSH & SEYMOUR CORPORATION.
