

THE DOW CHEMICAL COMPANY

TEXAS DIVISION
FREEPORT, TEXAS 77541

September 17, 1971

D. N. Breeding
B-106

The following insulators were examined:

have abnormal breath-
ing tests and should take special precautions to avoid ex-
posure to irritating gases.

The cigarette smokers were warned of the danger of lung
cancer from the combination of cigarette smoking and asbestos
exposure and told to quit smoking.

I would like to come to your area at a time and place con-
venient for you to discuss the results of their examinations
with the examinees privately and individually.
