SUBJECT: PRODUCTS WITH COMPONENT PRICING

VISTA

A recent decision to price the LAC stream to Du Pont on a component basis prompted a review of product names and codes used in component pricing.

Attached is a summary of the current status of the streams and their component names and codes.

Please note that the Light Aromatic Concentrate's primary component has been assigned a new product code. This deviates from the procedure used for Propylene Concentrate and Butadiene Concentrate.

When component pricing was initiated, new product codes were assigned to the components. This caused a problem at the plant because the first product code on an order is used to identify the stream according to the Spec Book. But, the Spec Book did not have a specification for the components. So, the product code for the first component was changed to the product code for the stream. This satisfied the plant's identification problem. However, the product name in the Product and Container File had to be changed to reflect the component name on the invoice. This entire procedure distorted the history for that year in computer-generated reports.

For the LAC, we have left both the names and product codes for the two existing LAC streams intact. New product codes have been assigned to each of the two components. The spec sheet for the first component will reflect the specs for the stream, noting that the code is for the component pricing. In this manner, the plant will be able to identify the stream from the first code, and the computer-generated reports will accurately reflect all product names and volumes.

Please call if you have any questions on this matter.

INDUSTRIAL CHEMICALS PRODUCTS WITH COMPONENT PRICING

Stream		Components		Spec Book	
Name	Code	Name	Code	Specs ¹	Note
Propylene Concentrate	5122-00	--	--	yes	Component Pricing
		Contained Propylene	5122-00	yes	Component Pricing
		Contained Propane +	5122-02	no	Component Pricing
Butadiene Concentrate Texaco	5142-00	--	--	yes	Component Pricing
		1,3-Butadiene	5142-00	yes	Component Pricing
		Heavy Diluents	5136-00	no	Component Pricing
		Mixed Butylenes	5137-00	no	Component Pricing
		Mixed Butane	5138-00	no	Component Pricing
		Light Diluents	5139-00	no	Component Pricing
		--	--	yes	Component Pricing
Texas Petrochemicals		1,3-Butadiene	5142-00	yes	Component Pricing
		Butylenes-LC	5140-00	no	Component Pricing
		Other Diluents-LC	5141-00	no	Component Pricing
		--	--	yes	Not Applicable
Light Aromatic Concentrate	5180-00	--	--	yes	Not Applicable
		LAC Raffinate	5184-00	yes	Component Pricing
		Contained Benzene	5185-00	no	Component Pricing

¹ A spec sheet is available for each product code. Specifications are detailed only on the sheets marked "yes". All other sheets contain a note explaining the use of the product code (i.e. Component Pricing).
