JERRY,

Did you know! At the shellcore
miller they use a chemical called
HEXAMETHYLENETETRAMINE. It is
in a 60 lb. bag, It takes 1 whole
bag APROXAMATLY 23 times a day.
(A total of 23 bags a day)

Also MR. FRANKLIN, a worker in
that AREA showed me an
asbestos blanket on the machine
that he works at.

Amy

P.S. PARTICULATE AROSE in the
lower deck rising to the upper
deck where MR. FRANKLIN works.
Also out in to the atmosphere
