PRICE LIST

No. 62

EFFECTIVE JANUARY 24, 1921

Prices Subject to Change Without Notice

TERMS

On Paints, Varnishes and ODP Lead—sixty days net; 2% for cash within ten days from date of invoice

On Turpentine, Linseed Oil, Dry Colors, Insecticide Material, and goods not of our own manufacture—thirty days net; 1% for cash within ten days from date of invoice

IMPORTANT

Shortages or errors in billing must be reported within ten days from receipt of shipment to secure proper adjustment

In making all shipments our responsibility ceases when we receive a signed bill of lading from the transportation company. Claims for losses and damage in transit must be filed with the transportation company by our customers. If shipments are received in a damaged condition, or short in the number of packages, be sure to have the freight agent make such notation on the paid expense bill. This will enable you to file and collect claim without affidavit.

ANTYDAMP 01326

Foundation Damp-Proofing

A very heavy black paint of asphalt type which is applied to the exterior of concrete and masonry foundations below ground level, to damp-proof basement walls. For ordinary damp-proofing, two coats should be applied. Will cover approximately 40 square feet, two coats to the gallon. Is applied cold in original consistency except in very cold weather, when it is necessary to warm slightly before applying. Remains in an elastic condition indefinitely.

PLASTER BOND

For damp-proofing interior walls above grade

A specially prepared paint of asphalt type which is applied without heating on inside brick, building tile or concrete walls above grade, before plaster is applied, to serve as a damp-proofing. Does away with the necessity for furring or lathing. May be applied by brush or spray method. One coat only required. Covers approximately 100 square feet to the gallon, varying with the porosity of the wall. Plaster should be applied anywhere from 24 to 72 hours after plaster bond has been applied to wall.

THE LARGEST PAINT AND VARNISH MAKERS IN THE WORLD

The paints, varnishes, colors and specialties listed in the following pages include everything demanded in modern finishing. They will satisfactorily supply the paint and varnish needs of the painter and decorator, the sign-writer, the contractor and builder, the architect, the carriage custom and repair shop, the property owner, the farmer and the housewife.

We offer our line of products to the trade with the knowledge that they will fulfill every claim we make for them and, when used as intended, will always prove satisfactory.

Controlling as we do, the supply of nearly all important raw materials used in our products and maintaining chemical laboratories and testing-rooms where they are carefully examined for quality, we are able to offer goods of higher quality, which are more reliable and uniform than those made by less favorably situated makers. When pushed by a live, wide-awake merchant, Sherwin-Williams Paints and Varnishes will overcome competition, bring good trade and profits and give the dealer a reputation for reliable goods that will be one of his most valuable trade assets.

The Sherwin-Williams Co. was founded in 1866. Ever since that time we have held strictly to the highest standard of quality in paint and varnish making. We believed that the best goods would sell the best and our splendid success has proved we were right. Today we are the largest concern of the kind and expanding rapidly. Our facilities include:

Factories in Cleveland, Chicago, Montreal, Newark, Bound Brook, N. J., San Francisco and London, England.

Warehouses and offices in principal cities from Atlantic to Pacific Ocean.

Representatives covering every important paint and varnish field in the world.

Linseed oil mills, where we make, treat and age strictly pure linseed oil for our products.

Lead and zinc mines and smelters, where we employ large forces of men to mine and convert these ores.

Intermediate, dye and chemical plants where we produce base materials for use in the manufacture of paints, stains, enamels, etc.

White lead plants, where we corrode white lead by the Old Dutch Process, and manufacture other lead products.

Acid manufacturing plants, producing great quantities of Acetic and other acids.

Dry color factories, the largest and best equipped in America, where our dry colors are made.

Lithopone plant, where the highest grade of lithopone is produced for use in Flat-Tone and kindred products.

Dry Lime-Sulfur, Arsenate of Lead and Paris Green factories, where we make a complete line of insecticides and fungicides.

Varnish, japan and drier works, where these products are made exclusively. Tin can factories, that make the tin cans we use.

Printing plant, with modern presses, bindery, sampling and finishing department, etc., where our advertising and printing are economically handled. Machine shops, that make mills and machinery of our exclusive design.

These facilities enable us to make sure our goods are right from the foundation up and save us much in cost of manufacture that is put into the quality of the goods and the maintenance of a strict standard of service.

SWP

SHERWIN-WILLIAMS PAINT, PREPARED

For Painting Buildings

The most durable and economical paint that can be made. There is no other material, either prepared or hand-mixed, that will give such uniformly good results. SWP is made from carefully selected materials possessing best paint qualities, thoroughly mixed in most scientific proportions to insure best results, and very finely ground in machinery of our own design.

On comparative test with lead and oil or cheaper materials, SWP will prove to cost less by the job, because it spreads more easily under the brush, saves the painter's time, covers the greatest number of square feet to the gallon, and wears the longest possible time. It will cover 360 square feet of average surface two coats to the gallon. Briefly, a given surface can be properly painted with SWP for a less average cost per annum than any other paint made, including pure white lead and oil.

SWP is made in one quality only, and that the very best that our long experience in high-grade paint-making indicates will give best results. SWP has been on the market for nearly 60 years and enjoys a higher reputation and larger sale than any other paint in the world.

SWP WHITES

OUTSIDE GLOSS WHITE

The most durable and economical white paint for general use on all exposed surfaces in all climates. S-W Outside Gloss White is a pure paint made from pure carbonate of lead, sulphate of lead, pure oxide of zinc and pure linseed oil, with the necessary drier and turpentine. There is no outside white paint made that will cover more surface per gallon, look as white and retain its whiteness and give such general satisfaction over a long period of time as S-W Outside Gloss White.

CHINA GLOSS WHITE

Slower drying and not quite so white as Inside Varnish White, but a very satisfactory finish on interiors where economy is of first importance.

FLAT WHITE

For finishing without a gloss or as a ground coat for S-W Inside Varnish White. The best paint for such purposes ever prepared for the market. Extensively used by contracting painters and decorators instead of lead, for flat coating.

INSIDE VARNISH WHITE

For producing a white, varnish finish on inside work. It dries better, works freer, and is more economical than the varnish whites under various names generally found on the market. Apply over two or more coats of Flat White.

SHERWIN-WILLIAMS PRODUCTS

ALUMINUM PAINT

Bright as Silver—Ready for Use

A lasting silver finish for use on radiators, ranges, water-boilers, gas, steam and water pipes, gas stoves, machinery, engines, etc. Also adapted for outside use on gas engines, boats, metal work, cornices, cupolas, etc. Gives most satisfactory results, because it is perfectly mixed and finely ground, works freely under the brush, has great spreading capacity, is fast in color, stands longest on outside exposure. Extreme heat and cold does not crack, peel, blister or discolor it. One coat covers a clean black surface. It has no disagreeable banana-like odor found in many other Aluminum paints.

AUTO SEAT DRESSING

Revives the appearance of scratched or old leather cushions and upholstery, removing old marks or stains readily. Dries perfectly hard in an hour or two, with a rich, dull black finish. Is not affected by the heat of the body and will not soften or stick to clothing. It can be easily washed and kept clean.

AUTO TOP DRESSING

Ready for Use

An excellent dense black dressing for renewing finish on mohair, pantasote and similar tops, side curtains and upholstery of automobiles. Can also be used on leather furniture, traveling bags and other leather or imitation leather surfaces. On mohair it dries with a dull black finish, while on leather, pantasote and other imitation leathers it dries with an eggshell gloss. Dries perfectly hard in three or four hours; is easy to apply and does not show laps or streaks. (Put up in friction top cans.)

AUTO ENAMEL

Ready for Use

A line of enamels made especially for refinishing motor cars by the car owner himself. S-W Auto Enamels are very durable, elastic and waterproof, and on account of their easy working qualities, it is possible for one inexperienced in painting to secure a high-class finish on his car without the loss of time attending the usual paint-shop job. Dries in about 48 hours, depending upon atmospheric conditions. Outside exposure or repeated washing will not harm the finish.

BRAS-BRITE

Liquid Metal Polish

A liquid preparation for cleaning and polishing brass and other polished metals. By repeated tests and comparisons, Bras-Brite has proved to polish more quickly and easily, requiring but little rubbing. Will not harden in the package and will keep in perfect condition in any climate. Non-explosive and can be used practically anywhere with perfect safety.

BRIGHTEN-UP STAIN

A Stain and Varnish Combined

Produces a stained and varnished finish in one operation on old or new furniture, floors or woodwork. Is easily applied and does not show laps or brushmarks. Surfaces previously painted may be changed to imitate any of the woods represented in this list by first applying a coat of Brighten Up Stain Ground, and after thoroughly dry, follow with the color selected.

BRONZING LIQUID

Three satisfactory bronzing liquids for mixing with gold, aluminum and brass bronzes. These liquids are unexcelled for decorative work, for when mixed with bronze they dry with a high gloss finish, and due to their splendid heat-resisting qualities, may be used on radiators, steam pipes, etc., without discoloring, peeling or blistering.

CARBON PAINT

Red Diamond Brand

A chemically inert paint made on a charcoal base, combined with the purest of linseed oil. This paint produces a thick film which affords wonderful protection against rust and decay to the metal surface to which it is applied. Especially adapted for use on bridges and all other structural work where good drying and extreme durability are necessary. This is a metal protective paint of the very highest type.

CORNISH EUREKA GOLD SIZE

A standard high-grade gold size manufactured under a secret process from high-grade materials. Used principally by carriage, car and sign painters and decorators for gold leaf, silver leaf, aluminum leaf, Florentine leaf, Dutch metal, or any other leaf known to the gilder's art. Is extensively used for gilding decorative work on interiors of churches, banks, theatres, passenger coaches, automobiles, sign painting, japanning, etc. Gilds splendidly over a flat color the same as over varnish color or rubbing varnish. Will not sag or run to an edge. Its durability is unsurpassed. Can be varnished over without danger of cracking. For directions see pamphlet, Form E-442.

CONCRETE AND CEMENT HARDENER

An Effective Preparation for Hardening and Waterproofing Concrete and Cement

Fills up the pores, greatly strengthening and hardening the cement or concrete thus insuring better wearing qualities. Prevents the dusting of cement floors and makes the surface thoroughly and permanently waterproof. Neutralizes the alkaline salts which may be present in the cement, making it much safer for painting. Can be applied with a brush or successfully sprayed. For directions see pamphlet, Form E-440.

CONCRETE FLOOR PAINT

Made especially for use on concrete and cement floors. The surface must be dry and free from dust and grease before application. Under ordinary conditions this material will dry over night and can be walked upon next day. Dries with a good gloss and will withstand hard wear. On new floors it is always best to first apply at least one coat of Concrete and Cement Hardener.

CONCRETE WALL FINISH

A high quality oil paint manufactured especially for exterior use on concrete cement, brick and stucco walls. Possesses extra heavy body, permitting reduction with linseed oil or turpentine, according to the porosity of the surface. Under ordinary circumstances two coats will produce a first-class job, and it is not necessary to use a primer or sealer first to obtain a satisfactory and waterproof surface. This material dries with a flat finish.

CRACK AND SEAM FILLER

Ready for Use

An elastic composition for filling cracks, crevices and seams in old and new floors. Will not shrink or dry up like putty or other so-called Crack and Seam Fillers on the market. Gives a smooth surface over which to apply paint or varnish. Has considerably more bulk to the pound than the average competitive product and consequently goes much further. Apply with putty knife or palm of hand.

DECOTINT WALL FINISH

A Cold Water Paint

Manufactured in dry, powdered form from carefully selected materials, and is so compounded that it requires only mixing with cold water to be ready for instant use. Is non-poisonous, contains no alkali, acid, or anything injurious to the health. Decotint produces a good sanitary wall finish, has splendid covering capacity, one pound covering from 60 to 100 square feet. A second coat can safely be applied as soon as first coat has become thoroughly dry.

DRY COLORS

Our splendid facilities for the manufacture of Intermediates, Dyes and Chemicals used in producing Dry Colors places us in the foremost position for supplying Dry Colors of the highest quality for use in paints, stains, enamels, etc.

The Dry Colors listed here are, with few exceptions, the same as we use in the manufacture of our own high grade products, the majority being the product of our own dry color factories, and as such will be found vastly superior in color, tone strength and fineness to the jobbing grade offered on the market.

EGG-SHELL MILL WHITE

Ready for Use

An intensely white finish for interior walls, ceilings and woodwork of factories, mills, dairies, stores, etc. Dries with an egg-shell gloss and is particularly desirable for its light-diffusing qualities, without the objectionable glare reflected by a high gloss paint. On account of its heavy body it has splendid hiding qualities, covering dark or poorly painted surfaces perfectly with two coats. The first coat should be reduced 25% with Reducer No. 83, which serves as a size and scaler. Second coat should be applied as it comes from the can.

FRENCH CROWN GREEN

Ground in Oil

A chrome green of very high quality, ground in linseed oil. This line of greens is unusually bulky, ground to an intensely fine texture, and possesses exceptional tinting strength. No better green can be found for window blinds, roofs, fences or any kind of painting where an intensely bright, permanent green is essential.

SHERWIN-WILLIAMS PRODUCTS

FIRST QUALITY COLORS IN OIL

Paste Form

Used largely by master painters for tinting White Lead and other paints. Also used quite extensively for sign-writing purposes. S.W. First Quality Colors in Oil represent the highest quality of colors ground in pure linseed oil. Are stronger in tinting power than any other oil colors on the market.

Flat-Tone

THE PERFECT FLAT WASHABLE OIL PAINT

The ideal flat wall finish for artistic decoration of interior plastered walls, ceilings and woodwork of residences, office buildings, schools, hotels, theatres, churches, etc. It is durable, sanitary and artistic, lending itself readily to the most pleasing combinations, and is truly economical because the original beauty of the newly-decorated wall can be kept ever fresh and attractive, as Flat-Tone can be washed with soap and water. For this reason, Flat-Tone costs no more in the long run than an ordinary calcimine or tint, because it will easily outwear several such coats. Highly satisfactory jobs can be obtained with two coats. The first coat should be thinned 50% with Flat-Tone Mixing Size, and the second coat applied as it comes from the can. Flat-Tone is also ideal for renewing and refinishing window shades.

FLAT-TONE MIXING SIZE

Especially designed for mixing with Flat-Tone. For the average unpainted surface, Flat-Tone Mixing Size should be mixed with equal parts of Flat-Tone for the first coat, thereby giving a coat of size and a first color coat in one operation. On hard sealed surfaces, or surfaces that have been previously painted, one quart of Flat-Tone Mixing Size to a gallon of Flat-Tone is sufficient.

SHERWIN-WILLIAMS PRODUCTS

COLORS FOR FLAT-TONE SYSTEM EFFECTS

Flat-Tone Glaze Colors are especially prepared for use on walls, ceilings and relief work to produce rich, transparent glaze effects over a suitable groundwork of opaque color. By using these colors in connection with Flat-Tone Glazing Liquid over a suitable groundwork, such as S-W Flat-Tone or ODP White Lead, the experienced decorator or painter can obtain an infinite variety of shades, with tones of great depth and beauty of color, and of a character impossible with any other finish. Owing to the variety of effects obtained, it is always possible to finish walls and ceilings in perfect harmony with the rest of the color-scheme, not only in an endless variety of colors, but also in effects, ranging from the simple transparent glaze to a two or three-color mottled and blended effect. Flat-Tone Glaze Colors are ground in oil to impalpable fineness, and by the addition of Flat-Tone Glazing Liquid can be reduced to the most delicate tones, yet always retaining their brilliancy, no matter what the reduction. They are extremely transparent, lack any tendency to clouding and blend admirably with suitable groundwork, giving a depth of color usually found only in rich fabrics. They are adapted for use in the most elaborate stencil decorations on walls and ceilings—both for application of the stencil itself and for "tinting in" the design.

SHERWIN-WILLIAMS PRODUCTS

FLAT-TONE MULTI-COLOR STIPPLE EFFECTS

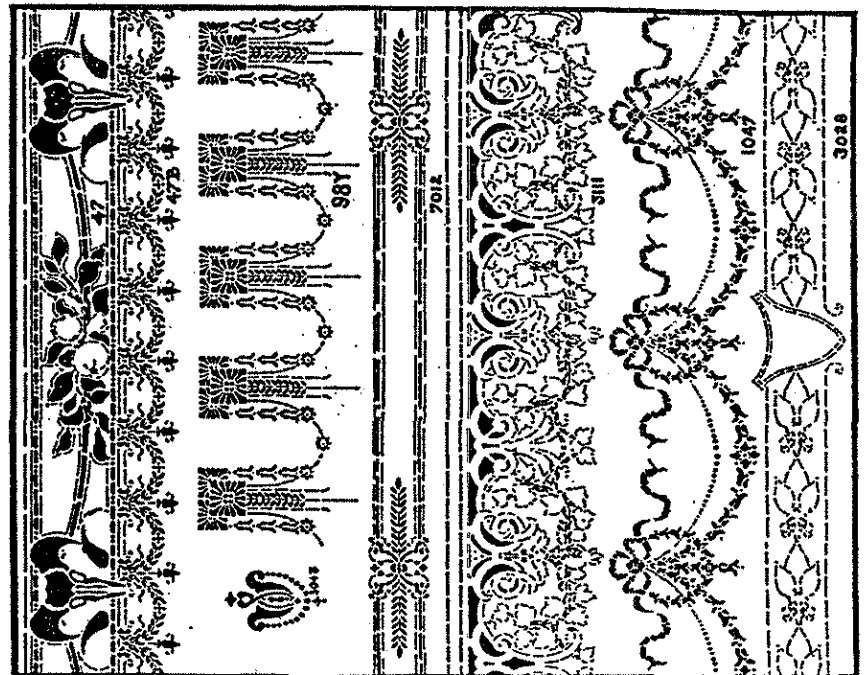

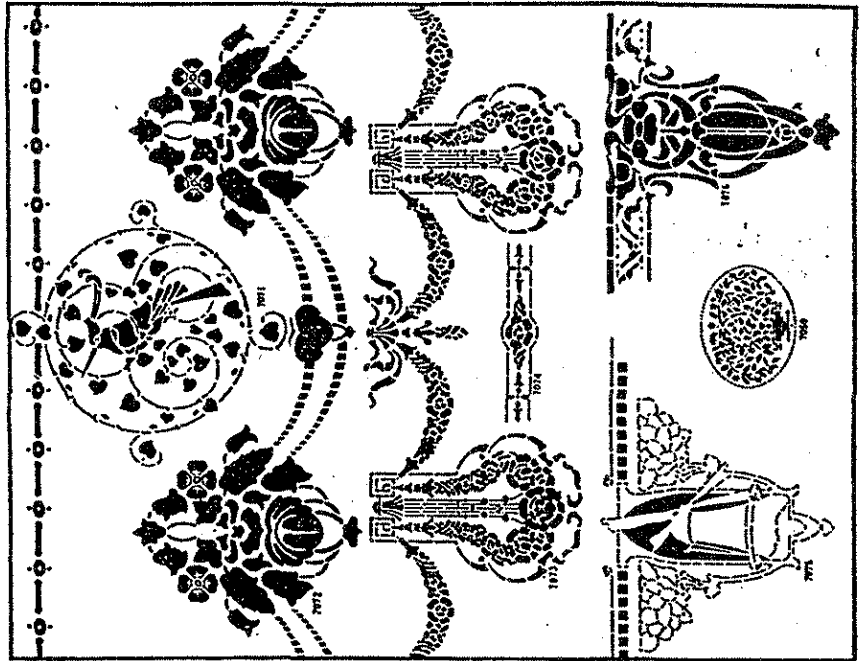

There is a well defined demand for a decorated wall which shall have an interesting and pleasing texture to relieve the severity of the wall painted in a simple plain color. While there are at present beautiful mottled effects which can be produced with S-W Glazing Materials, the demand has been for a stippled wall effect, which should require no special tinting colors, and which should be simple to produce.

The Flat-Tone Multi-Color process requires no special colors, only the regular colors of Flat-Tone shown in our color card, CC 10. A sponge is used to apply the stipple colors over the foundation color effect. This is done by rubbing the sponge into a small quantity of Flat-Tone which has been poured out on a board, being careful that the sponge does not take up too much paint so as to blur when applied to the wall. The sponge acts just like a rubber stamp, and makes a print of its own texture upon the wall. The more interesting the texture of the sponge, the more interesting will be the print upon the wall. Choose a sponge, therefore, with this in mind, selecting one of good size. Slice the bottom off with a large knife before wetting, and wash the sponge out in clean warm water. It is then ready to use.

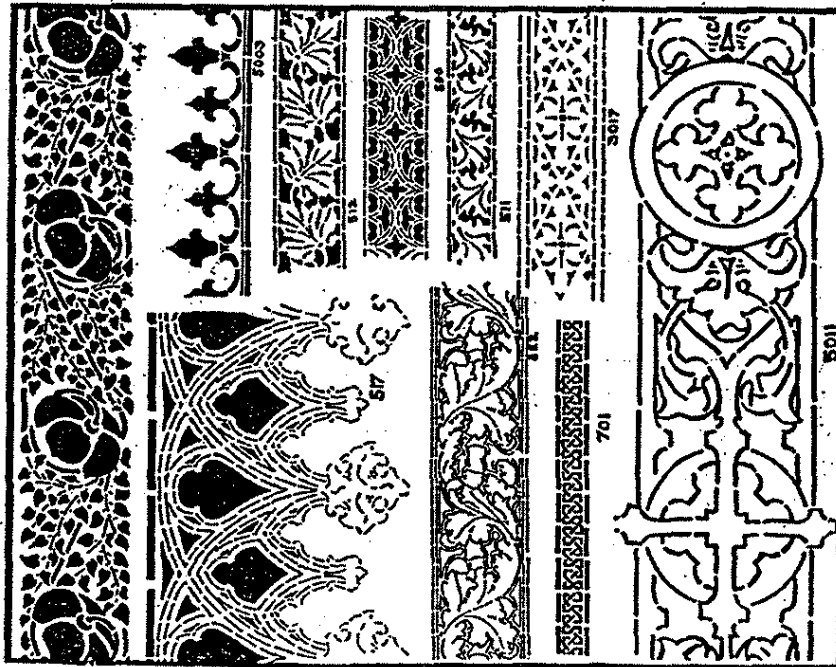

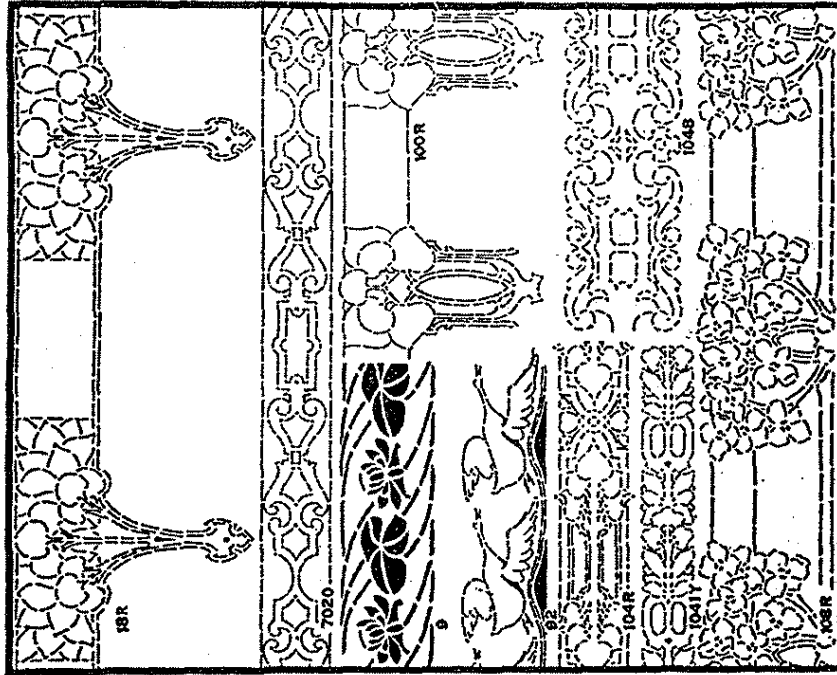

For full directions, see Form S-1678.

FLOORLAC

The All-Around Varnish Stain

Floorlac produces a beautiful stained and varnished effect in one operation on furniture, floors and woodwork, in fact, on any kind of a surface where a finish of this kind is desired. Floorlac represents the highest quality of stain scientifically combined with S-W Mar-not, a waterproof varnish. On new work it preserves to the greatest extent the beauty of the natural grain of the wood. Old work or surfaces previously painted can be changed to closely imitate the hardwoods represented in this list by first applying a coat of Floorlac Ground. Floorlac dries with a high varnish gloss, is tough, elastic and durable, and will not show scratches or heel marks. The permanent dyes used in Floorlac make it sunfast.

FLOOR-WIPE

Prepared Ready for Use

A special preparation for cleaning and renewing the finish of waxed and varnished floors, waxed and varnished woodwork, furniture, etc. Makes old waxed or varnished surfaces look like new. A cloth should simply be dampened with the material and the floor wiped up just as an ordinary cleaning—no rubbing or polishing necessary. Works splendidly with any floor mop.

GALVANIZED IRON PRIMER

For first coat on galvanized iron. A perfect undercoater for subsequent coats of paint, which prevent peeling or scaling, so common where ordinary oil paints are applied directly to galvanized iron. Absolutely dependable on interior or exterior surfaces, store-fronts, roofs, pinnacles, etc. Dries hard in 12 to 24 hours. For best results the succeeding coat of paint should be applied within 24 to 48 hours. Made only in one color—Gray.

GRAINING COLORS—IN DISTEMPER

Paste Form

Used for the same purpose as Prepared Graining Colors in Oil. Ground in water without size. Preferred by some decorators on account of their quick drying qualities. Should be reduced to the desired consistency with a solution of water and cabinet-makers' glue in proportion of one-fourth pound of glue to the gallon of water.

GRAPHITE PIPE-JOINT AND GASKET COMPOUND

Ground in Oil

Makes a perfectly tight joint with less labor and cost than red lead or other materials, and in addition allows the various fittings on which it has been used to be uncoupled with very little labor and without loss or breakage, characteristic of red lead, cement or rust-set joints. No waste through growing hard in the package like red lead or other similar materials.

METALASTIC

A strictly high-grade liquid metal protective paint, finely ground, with good body and a covering capacity from 1,000 to 1,200 square feet on structural steel. This is a metal protective paint made from the best graphite, ground in pure linseed oil, and has no equal for preventing rust and corrosion of all metal surfaces. It is exceedingly elastic and yields readily to expansion and contraction.

OLD DUTCH ENAMEL

"Beats the Dutch for Whiteness"

Here we have an enamel equal in every sense of the word to the best imported enamels. There is no other enamel made in America today that possesses the same high qualities of many of the imported enamels in durability and appearance. Old Dutch Enamel is not a varnish enamel and consists only of the highest quality finely ground zinc—ground in processed linseed oil. For this reason Old Dutch Enamel will not turn yellow with age nor "alligator" like varnish enamels. This is one of the nicest enamels to apply, as it flows remarkably free, does not "set up" quickly and can be worked over large panels without showing laps or streaks. Old Dutch Enamel comes in three shades: White, Ivory, and French Gray, approved and selected by the nation's leading architects and decorators. It is supplied in two finishes—gloss and egg-shell. Old Dutch Enamel can be used for both interior and exterior work.

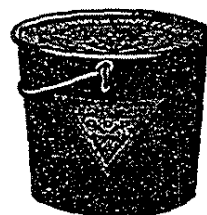

For undercoats use either S-W ODP White Lead or S-W Enamel Undercoater No. 12.

SHERWIN-WILLIAMS PRODUCTS

SHERWIN-WILLIAMS ODP WHITE LEAD

A strictly pure white lead manufactured on the Old Dutch Process of corrosion. It is ground in strictly pure refined linseed oil and is actually finer in texture than any other white lead on the market. ODP White Lead is soft in the package and easy to work up, yet it preserves a covering capacity and a wearing consistency which is unexcelled. ODP White Lead is of the same high quality that is found in every other Sherwin-Williams product, whether it be a paint, varnish, stain or enamel.

ODP White Lead is put up in strong steel kegs that keep out the moisture and air and do not absorb the oil, hence the lead is always fresh and in as good condition as when it left the mill. When empty, the steel packages are easily cleaned and may be put to many different uses in the paint shop or around the house.

This guarantee appears on every package:

This package is warranted to contain nothing but Strictly Pure White Lead, ground in Strictly Pure Linseed Oil, and we will pay one ounce of gold for every ounce of adulteration that it may be found to contain.

SHERWIN-WILLIAMS PRODUCTS

PASTE COLORED PAINT

(P. C. P.)

This line of paste paints in white and colors is a composite paint manufactured from high quality pigments ground in pure linseed oil to a paste form. On account of its additional bulk and unusually fine grinding, it will take one gallon more oil per hundred pounds than a similar quantity of white lead. For this reason it is more economical than lead, and on account of its zinc content will cover more surface per gallon and outwear a paint made from lead alone.

PERMENTO

Cold-Water Paint for Outside Use

Permento is designed especially for use on the exterior of buildings, air-shafts, fences, sawmills and other similar structures. Owing to its great disinfecting qualities, it is an ideal coating for cattle barns, pens, chicken-coops, etc.

Five pounds of Permento, when mixed with cold water to the proper consistency, will make one gallon of paint which will cover about 200 square feet of an average surface.

For colors and more complete information, see color card.

POLISH-OL

A Polish of Quality

Polish-ol is more than a furniture and woodwork polish; it is a paint and varnish "food" or reviving agent that brings out and intensifies the original finish, produces a handsome gloss and is not harmful to the finish. Being primarily manufacturers of highest grade paints, enamels and varnishes, we are interested in prolonging the life of finishes obtained with these materials and offer Polish-ol as the best polish we can produce for furniture, woodwork, floors, pianos, victrols, automobiles, etc.

The automobile owner will find it most effective for cleaning and polishing automobile bodies, fenders, radiators, in fact all finished parts.

QUICK-DRYING COLORS

Ground in Japan

Abbreviation for Patent Press Cans "PC"

For use as color-coats in the finishing of automobiles, coaches, cars, carriages and other surfaces. Should be applied over suitable undercoatings and varnished over, or may be combined with varnish for making color-varnish coatings. These colors are recognized the world over as the standard of excellence in the finishing of fine vehicles and railway equipment. The peculiarities, the natural tendencies of working and wearing qualities of each individual color are carefully studied, and each is treated in such a way as to bring out its natural good qualities or minimize any inherent defects. They are brilliant in tone, possess best working, drying and flattening qualities, are uniform in color and grade and thoroughly reliable.

The following colors are filled in one-pound cans, also in five-pound press cans, except where other packages are specified:

PRESERVATIVE SHINGLE STAIN

This line, consisting of all the popular shades of reds, browns, greens and grays, is manufactured on a high-quality basis. It is a line of penetrating stains—not thin paints that wash off with the first rain or that soon fade. These stains contain refined creosote and other liquids that penetrate and stain the wood to a considerable depth, and for this reason will maintain their color long after other stains have faded away. In our Greens, for instance, we use Chemically Pure Chrome Green and can point to thousands of green roofs throughout the country that are splendid testimonials to the permanency of this line.

HANDCRAFT STAINS

Spirit soluble, penetrating type

Highest grade artistic stains for use in finishing finest interior woodwork, furniture, etc. Are adaptable to hardwood and softwood alike. These stains are individual in tone, dry without showing streaks or brush marks and are permanent to light. Do not raise the grain of the wood, therefore require no sanding.

STOVE-PIPE AND IRON ENAMEL

For refinishing stove-pipes, grates and similar iron surfaces subjected to heat. Should be applied while the surface is slightly warm, and allowed to dry 24 hours before subjecting to high temperature, under which conditions it will be practically smokeless and will produce a better surface and wear longer than any other stove pipe enamel or stove-pipe varnish on the market.

TAXITE—Paint and Varnish Remover

Taxite is the name of our paint and varnish remover, which is both efficient and economical. Efficient because it cuts the paint and varnish in the shortest possible time, and economical because it saves time, labor and material. It works splendidly on upright surfaces, as it penetrates immediately and does not run off. Has no equal for removing old coats of paint and varnish, no matter how thick, quickly and effectively. Apply with a brush and allow to stand 10 or 15 minutes, then scrape off with a putty knife and clean the surface thoroughly with benzine or denatured alcohol. Taxite does not injure the skin, discolor or raise the grain of wood.

UNIVERSAL THINNER

This product was developed to fill a demand for a suitable thinner for all kinds of paste and liquid paints where turpentine is not absolutely essential. It should not be confused with the many petroleum distillates and mineral spirits which are offered as turpentine substitutes. Universal Thinner is not a substitute turpentine. Its solvent properties are approximately 60 per cent higher than the best mineral spirits.

Put up in 1 and 5-gallon cans, and barrels.

Prices on application

(Subject to market fluctuations.)

VERDELITE

The Satisfactory Green—Paste Form

A popular priced line of chrome greens manufactured in four shades, Light, Medium, Dark and Olive. Particularly adapted for store fronts, window blinds, roofs, etc. Offers splendid value for the money.

SHERWIN-WILLIAMS VARNISHES

The facilities afforded by the largest system of paint and varnish factories in the world, give us advantages for the manufacture of varnishes that cannot be duplicated in any other plant. We manufacture all the linseed oil we use, and are thus able to control the quality of this all-important ingredient. We use the very finest quality of varnish gums, specially selected for each particular grade of varnish. Our chemical laboratories are complete in every detail so that we can apply every known test to both raw materials and finished products, and make sure that they are not only of highest quality, but conform to standard in every respect.

We list on the following pages the most largely used lines of varnish we manufacture. Each is designed to meet a specific requirement. All conditions which surround its use are taken carefully into consideration, and the varnish must demonstrate through practical test that it meets every requirement for the purpose intended, before it is placed on the market. S-W Varnishes can always be depended upon to give satisfactory results. They have long since passed the experimental stage, and the success which has attended their use for many years is sufficient guarantee of their quality.

We also list a very complete line of Driers, Japans, Asphaltums, Shellacs, etc. Each product is the standard of quality for the purpose intended, and has been in use for years with entire satisfaction.

With such a complete and satisfactory line the dealer is in position to handle the varnish business in his locality to the very best advantage.

Some of our varnish fires. Skilled varnish-makers combine the melted gums and linseed oil at high temperature

VARNISH LEADERS

The Waterproof Floor Varnish.

Mar-not is a pale durable floor varnish, possessing maximum water-resisting qualities, designed for use on all floors, and particularly adapted to parquet flooring of oak, light maple or birch, as well as linoleums. Mar-not should be applied directly to the wood or linoleum, reducing the first coat slightly with pure spirits of turpentine (about one pint to the gallon,) applying the succeeding coats without reduction. Do not use shellac or pigment first-coaters of any kind under Mar-not. Mar-not is easily applied, flows out evenly, dries dust-free in two to three hours and can be walked on in twenty-four hours.

The Waterproof and Heatproof Interior Varnish.

A pale, full-bodied varnish designed for the finest interior woodwork in homes, banks, office buildings, etc., where a strictly first-class finish is demanded. Dries with a full gloss so that it can be left in its natural state, if desired, or it can be rubbed to a dull finish with pumice-stone and oil or water in about forty-eight hours. Scar-not takes a beautiful polish.

The King of all Spar Varnishes.

Rexpap represents the highest type of spar varnish, being very pale in color, full-bodied, producing a film that is both waterproof and weatherproof, successfully withstanding varying atmospheric conditions such as extreme heat and cold, snow, wind, salt spray and sun. It is therefore ideal for steamships, yachts, canoes, outside doors, porch ceilings, kitchens, bathrooms, etc. Dries dust-free in from two to three hours and hard enough to re-coat in from fifteen to eighteen hours. Our varnish policy is "A special varnish for each special purpose," but if you want a single varnish for many purposes, use Rexpap (King of all Spar Varnishes.)

The Good Old-Fashioned Master Painters' Varnish.

Kopal is a long-oil type of varnish of fairly light color, heavy in body, and has been popular for many years with master painters everywhere, on account of its high quality and utility. It is well adapted for use on front doors, porch ceilings, porch and lawn furniture, bathrooms, kitchen woodwork, etc. Dries dust-free in from four to five hours and can be re-coated in twenty-four to thirty-six hours.

EXCELLO—The Master Painters' General Interior Varnish.

A pale varnish of heavy body that works freely. Dries dust-free in three to four hours and hard enough to rub in forty-eight hours. It dries with a high gloss and is far superior to any hard oil finish. Excello represents one of the best intrinsic values in our entire architectural line of varnishes.

No. 1 FLOOR.

A pale medium-grade floor varnish. Dries dust-free in three to four hours. Has average toughness and elasticity, along with good water-resisting qualities.

No. 1 COACH.

A low-priced coach varnish for the less expensive interior work. Dries hard in twenty-four hours, with a high gloss.

PREMO HARD OIL.

Pale in color. Dries hard over night. Recommended for medium-grade interior work of all kinds.

VELVET FINISH No. 1044

This varnish, instead of drying with a gloss, dries to imitate a dull rubbed surface, thereby doing away with the expense and labor of rubbing. Contains no wax and will not rub to a glossy surface through wear. Shows little or no tendency to settle out in the package, and therefore is easily applied with uniform results. This varnish not tending to show laps or brush marks, can be applied over any other good varnish (or shellac) and does not spot or scratch white. Dries dust-free in two to three hours and hard over night.

MISSION-LAC.

A finish light in body and medium in color, that dries quickly with a shellac-like finish and will withstand washing with water. Is intended both as a quick-drying first-coater, also as a finishing coat on surfaces stained in mission effects. One coat on top of stain produces a finish similar to that secured with a coat of shellac and a coat of wax. Will not scour or bleed any well-made stain. Can be successfully dipped as well as brushed. Dries dust-free in one hour and thoroughly hard in twenty-four hours.

FINEST WHITE DAMAR

Made from the finest grade of damar gum and intended for use in making white enamels. Also used by printers and lithographers.

For prices, see page 58.

FIRST COATERS

MISSION-LAC

(See description on page 54.)

MARVELAC.

Popularly priced spirit first-coater, recommended in place of shellac. Used directly over stains, Marvelac brings out the brilliancy and depth of tone so greatly desired. Possesses wonderful sealing properties and is more water-resisting than shellac. Can be brushed, sprayed or dipped and comes ready for use. Can be thinned with 188°-proof denatured alcohol for dipping or spraying, if desired. Dries dust-free in a few minutes and sands in three to six hours without gumming the sandpaper.

LIQUID FILLER.

A pigment sanding first-coater of the better type. Dries in twenty-four hours and sands to a perfect finish for succeeding varnish coats. Stir before using.

SHELLACINE.

Quick drying pigment first-coater or liquid filler. Dries quickly and sands to a perfect finish. Should be thoroughly stirred.

FLAT-TONE MIXING SIZE—A Wall Size.

A high grade sizing coat for wall surfaces. A size for mixing with Flat-Tone and paints to be applied on plastered walls and ceilings. Is far superior to many low-priced wall sizes in spite of its higher cost, it being more powerful and stopping all wall suction perfectly. It is very pale in color, does not affect the delicate shades of flat wall finishes and adds to the durability, elasticity and washing properties of the paint to which it is added. As a first or sizing coat, use equal parts with Flat-Tone.

For prices, see page 58.

DRIERS AND JAPANS

HERCULES DRIER.

A high-grade concentrated dark drier of exceptional strength. Mixes readily with oil and will not curdle or spread. Will dry paste fillers promptly and thoroughly. Owing to its heavy body and great drying strength, it is most economical for the master painter. In proportion of one part drier to forty parts of oil, dries over night.

DRY-O-NITE.

A master painters' ideal drier. Perfectly safe for accelerating drying of oil paints, etc. Will not spread, precipitate, burn, saponify or curdle, but thoroughly dries the paint, leaving an elastic, smooth and wear-resisting surface.

JAPAN DRIER.

A medium priced drier for general work, possessing medium color and good drying strength. Is thoroughly economical and satisfactory.

GOLD SIZE JAPAN.

A pale heavy-bodied japan of superior quality. Its great strength makes it economical and it is perfectly safe to use with any mixture. A binder, which can be used with delicate colors without injury. Will properly harden rough stuff and facilitate the drying of all undercoats.

COACH PAINTERS' JAPAN.

Specially prepared for the coach painters' use, and thoroughly reliable for the preparation of all undercoatings. Acts as a hardening agent as well as a mixing japan and is always uniform.

For prices, see page 58.

ASPHALTUMS

FINEST TURPENTINE ASPHALTUM.

Made from the very finest black asphaltum, linseed oil and thinner. Is absolutely the best asphaltum that can be produced. Has good body and can be reduced if desired.

No. 1 ASPHALTUM.

Suitable for rough castings, sheet iron work, etc. Dries dust-free in fifteen to twenty minutes and can be handled in two to three hours.

PREMO ASPHALTUM (Quick Drying)

A quick drying black asphaltum, sold at a popular price, yet offering exceptionally good value. Works easily, covers well and possesses exceptional alkali and acid resisting qualities.

For prices, see page 58.

AUTOMOBILE AND CARRIAGE VARNISHES

BERGER'S ENGLISH BODY FINISHING.

A pale, heavy-bodied and durable varnish of great brilliancy designed for highest grade motor cars and carriages. Specially prepared with a view to easy working qualities and drying to meet the demands of the practical finisher in the custom shop. This varnish is made from the finest selected gums, matured under ideal conditions which render it perfectly ripe for use. Special care is exercised in the aging process. This helps bring out the great brilliancy for which the varnish is noted.

BERGER'S ENGLISH PALE RUBBING.

A pale, rubbing varnish designed for highest grade motor cars and carriages. Works freely and levels evenly. Dries to rub in twenty-four to thirty-six hours under normal conditions, although forty-eight hours should be allowed when shop conditions permit. This varnish is designed for mixing with colors, especially for the last or split-coat—when so mixed it will not curdle or thicken, as is so often the case with many present day Rubbing Varnishes of inferior quality. This varnish should be carefully rubbed or flatted, then followed by a full coat of Berger's English Body Finishing Varnish.

BERGER'S ENGLISH GEAR FINISHING.

A pale, heavy-bodied, waterproof varnish for motor car chassis and gears, carriage wheels, etc. Works freely and flows evenly producing a deep, well-rounded finish of great brilliancy and exceptional durability. Sets out of dust in five to six hours and dries hard in twenty-four to thirty-six hours. Use at full body over color and striping coats.

WEARING BODY FINISHING.

A high grade body finishing varnish, unsurpassed for durability. Has free work, ing and flowing qualities, dries dust free in five to six hours, can be handled next day and dries thoroughly hard in two to three days. Dries with a full, well-rounded out finish.

PALE BODY RUBBING.

A very high grade rubbing varnish of dependable quality. Is pale in color, heavy in body, works and flows freely. Dries to rub in twenty-four to thirty-six hours. For best results allow forty-eight hours. Will not thicken when used in zinc and lead colors and therefore can be used in making a split-coat color varnish.

PALE PERFECTION GEAR.

A very pale, durable, elastic, finishing varnish for running parts on a good grade of work over delicate colors, and on account of color, unusual working and flowing qualities, body and rich luster, it is the selection of many carriage and automobile shops. Will dry dust free in about six hours, hard enough to handle in thirty-four hours and hard in two days.

QUICK RUBBING.

Is pale in color. Dries dust free in two hours and can be rubbed in twenty-four to thirty-six hours. A splendid general purpose rubbing that holds out the finishing coat with a good full body.

Should not be used as a mixing varnish with zinc colors.

ELASTIC GEAR FINISHING.

The highest grade all-around gear finishing that can be made. Is pale in color, has good body, works and flows freely, dries dust free in four to five hours, to handle in twenty-four hours and hard in thirty-six hours. Has a high luster, is very elastic and durable.

For prices, see page 58.

CORNISH-EUREKA GOLD SIZE

For description and prices, see page 13.

MOTOR TRUCK AND WAGON VARNISHES

MOTOR TRUCK FINISHING

A high grade finishing varnish for motor truck and high grade wagon work. Is pale in color, heavy in body, works and flows freely, and dries to handle next day. Has a high lustre and is very elastic and durable.

MOTOR AND WAGON GEAR.

A very pale, hard drying varnish that can be used over delicate colors. Stands out with a good full body, dries to handle over night and has good water-resisting qualities.

DURABLE WAGON COACH.

A high-grade long oil varnish for wagons, trucks, tractors, implements, etc., possessing maximum durability and water-resisting qualities. Is quite pale in color, has unusually good body and dries to handle over night. A thoroughly dependable varnish.

PALE DURABLE IMPLEMENT COACH.

This is our leading implement coach varnish, which has long been a favorite of the largest manufacturers of agricultural implements in this country. It has unusual water-resisting qualities, and withstands the extreme tests of durability that harvesters, tractors and all other implements and farm machinery are subject to. Our unusually large output permits of this exceptionally low price.

For prices, see page 58.

INSECTICIDES AND FUNGICIDES

Sherwin-Williams Insecticides and Fungicides stand for quality and efficiency. Our experience as the largest manufacturers of spraying materials in the world has enabled us to make insecticides and fungicides which will control most effectively insects and diseases on fruits, vegetables, tobacco and cotton at a minimum cost to the purchaser.

Many brands of insecticides and fungicides appear on the market each year. Too frequently the consumer will buy these on a price basis only, without giving consideration to efficiency or other important points.

Sherwin-Williams Insecticides and Fungicides are economical to use because they will give maximum results at a fair price. They are manufactured in dry powdered form, which insures the purchaser against losses due to deterioration, freezing, leakage and reduces freight and handling costs to a minimum.

The chemical composition of Sherwin-Williams Insecticides and Fungicides conforms with state and government regulations, and the mixing qualities are of the best.

Sherwin-Williams Insecticides and Fungicides are recommended to our customers on a thoroughly tested basis. They are thoroughly tested under actual field conditions.

Sherwin-Williams Insecticides and Fungicides are the best insurance that one can buy for the protection of every crop that requires spraying.

SHERWIN-WILLIAMS PRODUCTS

DRY POWDERED ARSENATE OF LEAD

Sherwin-Williams Dry Powdered Arsenate of Lead is the lightest and fluffiest arsenate of lead made. These properties insure good mixing and suspension and uniform and effective control of chewing insects. This material contains from 30 to 33 percent of arsenic oxide and less than 1 percent water soluble arsenic. Consequently maximum insect-killing is obtained without any injury to fruit or foliage. Whether used as a wet spray or as a dust, S-W Dry Powdered Arsenate of Lead will give maximum results.

DRY ARSENATE OF CALCIUM

Sherwin-Williams Arsenate of Calcium complies with every government specification covering physical qualities and chemical analysis. It is of especial value applied as a dust in the control of Cotton Boll Weevil.

S-W Arsenate of Calcium comes in dry powdered form and is extremely fine, having a density of not less than 80 or more than 100 cubic inches to the pound. This insures even and economical distribution on the cotton plant. S-W Arsenate of Calcium contains not less than 40 per cent of arsenic oxide and less than 1/4 of one per cent of water soluble arsenic. These qualities insure quick killing of the Boll Weevil without any injury resulting to the cotton plants.

DRY LIME-SULFUR

("The Original")

Dry Lime-Sulfur is the most valuable new spraying product that has been developed in recent years. For a long time Lime-Sulfur Solution has been the standard dormant and summer spray for apples, pears, plums and other tree fruits. Orchardists are familiar with the disadvantages connected with the use of Lime-Sulfur Solution. These include heavy handling of barrels, losses due to leakage, crystallization and freezing and freight on water.

S-W Dry Lime-Sulfur is the only true Dry Lime-Sulfur made today. It is not a substitute for Lime-Sulfur Solution, but is standard 33° Baume Lime-Sulfur Solution in dry powdered form. It dissolves readily in water and will control all insects and diseases just as effectively as Lime-Sulfur Solution.

S-W Dry Lime-Sulfur is an effective remedy for San Jose and Oyster-Shell scale, peach leaf curl, peach blight, peach twig borer, apple and pear scab, brown rot of apricot, red spider and mites on citrus fruits.

SHERWIN-WILLIAMS PRODUCTS

PARIS GREEN

Sherwin-Williams Paris Green is recognized by potato and tobacco growers as an old reliable and effective brand. S-W Paris Green will kill insects quickly because it contains about 56 per cent of arsenic oxide, which is in excess of that required by the government. S-W Paris Green will not burn the plants, because it contains less than 3 1/2 per cent water soluble arsenic.

S-W Paris Green is extremely fine and excels all other brands in suspension qualities when used as a wet spray and is more economical and effective when used as a dust.

TUBER-TONIC

Sherwin-Williams Tuber-Tonic is an ideal combined dry powdered insecticide and fungicide consisting of Paris Green and Bordeaux Mixture for exclusive use on potatoes to prevent early and late blight and to destroy potato "bugs" and other potato insects. It possesses the adhesiveness of arsenate of lead on account of its extreme fineness and will adhere to the potato plant for the longest possible time when applied either as a dust or as a wet spray. Tuber-Tonic is effective against Blight and "bugs" when used at the rate of 1 1/2 to 3 pounds to 50 gallons of water.

FUNGI-BORDO

Sherwin-Williams Fungi-Bordo is an extremely fine, fluffy Bordeaux Mixture in dry powdered form. It is made of the best grade of lime and blue vitriol. S-W Fungi-Bordo mixes readily with water and stays well in suspension. It is very effective when applied as a dust.

Fungi-Bordo is the only prepared Bordeaux Mixture on the market that is properly balanced in blue vitriol and lime content. Because it contains 12 1/4 per cent of copper, 6 or 8 pounds to 50 gallons of water will give a 3-3 and 4-4-50 Bordeaux Mixture. Other brands containing from 1 1/2 to 22 per cent of copper cannot produce properly balanced Bordeaux Mixture.

Sherwin-Williams Fungi-Bordo will control all fungous diseases of apples, pears, cherries, grapes, strawberries and those of vegetables. The use of Fungi-Bordo eliminates all of the inconvenience connected with the making of home-made Bordeaux. It is better than commercial paste Bordeaux Mixtures because it is more easily mixed with water, will not deteriorate and is more effective in the control of fungous diseases.

SHERWIN-WILLIAMS PRODUCTS

PESTROY

Sherwin-Williams Pestroy is a convenient ready-to-mix combined insecticide and fungicide consisting of dry Bordeaux Mixture and Arsenate of Lead for use on fruits and vegetables. It is extremely fine and stays well in suspension when applied as a wet spray. S-W Pestroy may be applied as a dust both effectively and economically.

S-W Pestroy contains 85 per cent of Dry Bordeaux Mixture and 15 per cent of Dry Arsenate of Lead. This combination will insure a properly balanced spray mixture.

S-W Pestroy should be used to control chewing insects and fungous diseases of apples, pears, quinces, cherries, grapes, currants, gooseberries, potatoes, tomatoes, cucumbers, eggplant, beans, etc.

PRUNING COMPOUND

Sherwin-Williams Pruning Compound is the best material to apply to large wounds made in pruning both fruit and shade trees. If large cut surfaces remain unprotected against weathering and disease, enormous damage may result.

Sherwin-Williams Pruning Compound is a ready-for-the-brush linseed oil and white lead mixture which will prevent cracking or weathering of the wounds and is antiseptic. It is used extensively by orchardists and foresters.

HARMLESS SHEEP MARKING LIQUID

This is a paint made in three colors which will absolutely adhere to the wool in spite of all weather conditions. It is a big favorite with particular sheep raisers, because it holds its color on the wool, yet will wash out in the scouring process. It is unquestionably the finest sheep marking liquid produced.

Prices on application**CARBOLIC-OL**

Carbolic-ol is an effective wood preservative composed of pure anthracene oil derived from the distillation of pure coal-tar. It is a high boiling point oil and may be applied by brushing, spraying or dipping. By actual performance it has been demonstrated to be one of the most effective wood preservatives on the market.

It should be used by traction and telephone companies, cold storage and ice companies, tanneries, poster advertising companies, mining and smelting companies, fisheries, factories and coal and lumber companies. It is a fit product to use on wood that is exposed to weather, which demands a high quality wood preservative.

No. 40 French Carmine (Glass) (149)	50 1/2
No. 40 French Carmine (1/2-lb. tubes, net per doz.)	30 1/2

GRAINING COLORS—PREPARED

(Paste Form, in Oil)

Very finely ground in vehicles which enable the colors to comb and wipe out very effectively over a satisfactory ground coating. Furnished in all popular hard-wood effects.

	per pound
Ash (96)	44 1/2
Cherry (101)	46 1/2
Chestnut (100)	46 1/2
Dark Oak (97)	46 1/2
Light Oak (96)	46 1/2
Maple (96)	46 1/2
Mahogany (101)	46 1/2
Walnut (95)	46 1/2
Ground Color (96 L, 91 D)	46 1/2

GRAINING COLORS—IN DISTEMPER

(Paste Form, Ground in water without rise)

Very finely ground and chosen in tone, hence more desirable than colors mixed from dry materials. A full range of coloring pigments.

Put up in jars containing about 8 1/2 fluid ounces (each jar varies in weight according to gravity of color).

For prices, refer to Trade Sales Section of the Price List and use Dealers' Net Prices.

PRICE LIST

No. 62

EFFECTIVE JANUARY 24, 1921

Prices Subject to Change Without Notice

TERMS

On Paints, Varnishes and ODP Lead—sixty days net; 2% for cash within ten days from date of invoice

On Turpentine, Linseed Oil, Dry Colors, Insecticide Material, and goods not of our own manufacture—thirty days net; 1% for cash within ten days from date of invoice

IMPORTANT

Shortages or errors in billing must be reported within ten days from receipt of shipment to secure proper adjustment

In making all shipments our responsibility ceases when we receive a signed bill of lading from the transportation company. Claims for losses and damage in transit must be filed with the transportation company by our customers. If shipments are received in a damaged condition, or short in the number of packages, be sure to have the freight agent make such notation on the paid expense bill. This will enable you to file and collect claim without affidavit.

SHERWIN-WILLIAMS PRODUCTS

SHERWIN-WILLIAMS ODP WHITE LEAD

A strictly pure white lead manufactured on the Old Dutch Process of corrosion. It is ground in strictly pure refined linseed oil and is actually finer in texture than any other white lead on the market. ODP White Lead is soft in the package and easy to work up, yet it preserves a covering capacity and a wearing consistency which is unexcelled. ODP White Lead is of the same high quality that is found in every other Sherwin-Williams product, whether it be a paint, varnish, stain or enamel.

ODP White Lead is put up in strong steel kegs that keep out the moisture and air and do not absorb the oil, hence the lead is always fresh and in as good condition as when it left the mill. When empty, the steel packages are easily cleaned and may be put to many different uses in the paint shop or around the house.

This guarantee appears on every package:

This package is warranted to contain nothing but Strictly Pure White Lead, ground in Strictly Pure Linseed Oil, and we will pay one ounce of gold for every ounce of adulteration that it may be found to contain.

	per pound
300 and 500-pound casks.....	..
100-pound steel kegs.....	..
25 and 50-pound steel kegs.....	..
12 1/2-pound steel kegs.....	..
1 and 5-pound tins.....	..

(See Special Price Card, Form R-356)
