All Test Sample Labels contain a pressure sensitive adhesive for ease of attaching to the container. It is suggested that information entered onto these labels be done with a typewriter and then oversprayed with a clear fast drying lacquer such as the aerosol Kem Hi Gloss Clear so as to prevent smudging or smearing of the typewritten entries.

Identity of the various Test Sample Labels is as follows:

<u>Item</u>	<u>Form No.</u>
Label For Pints	990759013
Label For Quarts	990759014
Label For Gallons	990759016
Label For Glass Or Non- Standard Containers	39012

Stocks of the above are maintained at the North Olmsted Printing Division. Laboratories should order these by form number.
