New Information On Hair Dryers; CPSC Hot-Line Swamped By Calls

WASHINGTON, D.C., April 17 -- Amidst an overwhelming level of consumer telephone inquiries, CPSC has prepared an updated listing of those hair dryers which are believed to contain asbestos, based on recent information provided CPSC by various manufacturers and retailers.

Since an initial preliminary list was issued April 6th by CPSC, five major corporations and one major retailer have identified more than 40 additional models of hair dryers manufactured with asbestos. This supplemental information brings to 111 the number of different models with asbestos, as disclosed by industry.

CPSC staffers currently are handling more than 2,500 consumer inquiries about asbestos in hair dryers every day on the nationwide CPSC Hot-line. But according to telephone company sources, as many as 6,000 callers every hour are unable get through to the Hot-line because of the heavy load of inquiries. Since early April this level has occasionally caused chnical over-load problems for the telephone company's East Coast toll-free systems and its communications satellite.

The regular CPSC Hot-line crew of three has been supple **New Hair Dryer Data**

The new data, submitted in response to the first Special Orders sent by CPSC to major manufacturers and retailers early this month, identifies 44 additional models of hand-held dryers and styles, as well as 1 model of the salon type used by consumers at home and in commercial hair-styling establishments. These major manufacturers and retailers account for about 90 per cent of the annual U.S. sales of hair dryers.

A second assembly of CPSC Special Orders seeking comparable information has been sent to 69 small domestic manufacturers and importers of hair dryers. CPSC expects to receive most of the responses to these Special Orders by the end of next week.

Additionally, CPSC staff is seeking approval from the Commissioners to issue a third group of Special Orders to about 50 manufacturers and importers of hair dryers used in commercial salons. Most of the manufacturers of these models are distinct from the companies which produce and sell the hand-held variety.

Send the link for this page to a friend! The U.S. Consumer Product Safety Commission is charged with protecting the public from unreasonable risks of serious injury or death from more than 15,000 types of consumer products under the agency's jurisdiction. Deaths, injuries and property damage from consumer product incidents cost the nation more than $700 billion annually. The CPSC is committed to protecting consumers and families from products that pose a fire, electrical, chemical, or mechanical hazard or can injure children. The CPSC's work to ensure the safety of consumer products - such as toys, cribs, power tools, cigarette lighters, and household chemicals - contributed significantly to the 30 percent decline in the rate of deaths and injuries associated with consumer products over the past 30 years.

To report a dangerous product or a product-related injury, call CPSC's hotline at (800) 638-2772 or CPSC's teletypewriter at (800) 638-8270, or visit CPSC's web site at www.cpsc.gov/talk.html. To join a CPSC email subscription list, please go to www.cpsc.gov/cpsclist.asp. Consumers can obtain this release and recall information at CPSC's Web site at www.cpsc.gov.
