from December 4th, 1980?

A Yes.

Q In 1980 is when -- October of 1980 is when he underwent the hernia operation; isn't that right?

A Yes.

Q Over the last two months the patient has been feeling quite well. He has been dieting in the month of September and lost a total of 12 pounds.

He denies any decrease in his appetite, increasing in abdominal girth, abdominal pain.

So as of December 1980 he most likely had -- he definitely had the mesothelioma back then, didn't he?

A Yes.

Q But for some reason it just wasn't causing any pain?

A At that point in time.

Q At that point in time.

Did you review the records all the way through the course of his illness to his death?

A I reviewed all of the records that were made
