MCS 561 - Arvelor, Quench

Mr. E. V. Miller
Caterpillar Tractor Co.
Peoria, Illinois 61611

Dear Mr. Miller:

Your April 14 letter refers to information you request on our -
MCS 561 quenching.

Enclosed is a Thermine technical bulletin which gives most of
the information you asked for. On Page 2 is a description of
the composition of the product. On Page 46 is information on
toxicity and handling. Flash point of the product is 350°F COC
and the product does not give a fire point.

If you need more physical property information, I would be happy
to supply you with what we have available. If you would like
more detailed discussion of the toxicological aspects we would
suggest that your industrial hygiene department be in contact
with our Medical Department. I would be happy to make any
arrangements for that discussion.

Hope that this supplies the information you need.

Sincerely yours,

D. J. Massey
Project Manager
Development Department
