Mr. Jim Stock
Ford Motor Company
Vehicle Materials Development
20000 Rotunda Drive - Bldg. 5
Dearborn, MI 48121

Dear Mr. Stock:

After our meeting on July 26th, I began to look around for epidemiological data of the sort we discussed. Unfortunately, all I have come up with is reports of the findings. I am sure if you write the authors they would be most happy to send you the full reports.

The AIA "News & Notes" is a monthly newsletter available from the Asbestos Information Association/North America for a modest charge. You may have some interest in subscribing.

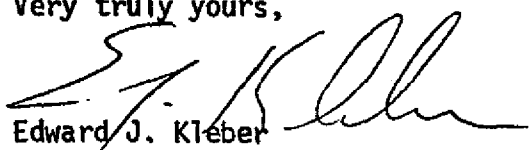

I have also included a brochure from the AIA which we give to all new customers. It is written in plain language and we encourage our customers to distribute it to their employees.

You asked us for a list of people who are in the sealer business. I am in the process of setting that up now and will try to have that list to you in the next week or so.

I plan to be in the company of Dr. H. B. Rhodes in Detroit the week of September 10. Dr. Rhodes has spent most of his time over the past 6-7 years on the asbestos/health question and is very knowledgeable on the subject. I will be calling you ahead of time and hopefully we can get together.

Please let us know if we can be of any assistance.

Very truly yours,

Edward J. Kleber
Technical Sales Representative
Midwest Region
