Mr. James E. O'Reilly
Exxon Production Research Company
3319 Mercer Street
Houston, TX 77027

Dear James:

This letter is to confirm our conversations regarding Vista Chemical Company's participation in the Offshore Operators Committee project entitled, "Toxicity of Mineral Oils in Water Base Muds".

A two gallon sample will be sent directly to Maurice Jones at his Houston laboratory. It is understood that he will then formulate the mud mixtures and send them to ERCO for testing as outlined in the OOC protocol. We look forward to receiving the study report and hope the agency is receptive.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager
