Subject: Disapprove of GMO mosquitoes being released in Florida

I disapprove of GMO mosquitoes being released in Florida. They have not been studied and we have no idea of their impact on long term environment and health issues.

There have been no environmental or human health studies and GMO mosquitoes cannot be recalled once they are released. Once Oxitec has their mosquitoes out in Florida and Texas, you can be sure they'll do it in other states. Oxitec either can't or refuses to satisfy basic questions about the potential long-term environmental or health impacts of these lab-created insects. Not needed. Not wanted. Not proven safe.

Please DO NOT allow these lab-created insects to be released in our state!

Thank you,
