Mr. Louis Pappas
Raw Materials Survey Group
Interchemical Corporation
Central Research Laboratories
Four Thirty-Two West Forty-Fifth St.
New York 36, New York

Dear Mr. Pappas:

This is in reference to our correspondence of last month concerning Aroclor 1242. We have finally heard that none of the Aroclors were included in the list of cleared substances which are listed in the Federal Register under Subpart F, Section 121.2520.

The reason given was that the Adhesives Manufacturers Association did not feel Aroclors had much use in adhesives that come in contact with food. We ourselves have no plan of petitioning for their inclusion.

Very truly yours,

R. Emmet Kelly, M. D.
Medical Director
