Attached please find a summary and details of all charges which have been incurred in Europe for the disposal of PCB/PCT containing materials.

The main reason for the difference between these figures and those previously forecast is that direct returns from customers to Antwerp or to Purle Waste/Rainham were partly unknown and were not included in the original estimates.

In addition an allowance of $ 30,150 is included to cover the total stocks of Pydrauls which we still hold but expect to sell before the November 30 cut off date.
