RE: LOSS PREVENTION - FEBRUARY 1, 1967

Dear Mr. Mallory:

Mr. W. H. Baker, Safety Director, was contacted to determine the status of the Industrial Hygiene recommendations submitted following the October 19th and 20th survey for Lead and Asbestos.

Mr. Baker reported six of the seven recommendations had been completed. The outstanding recommendation, #2, will be completed upon the arrival and installation of a new mixer.

The prompt completion of these recommendations is an indication of your plant's interest in preventing accident loss.

Employee Accident Experience

Your plant continues to produce one of the best loss records within Abex, and the best record of the larger operations.

Elevators

Am pleased to note a decision has been made to provide astragals for elevators #1 and #2.

Very truly yours,

Lee O. Gaskins
Loss Prevention Department
