Mr. Seymour G. Epstein
Technical Director, Safety & Health
The Aluminum Association, Inc.
818 Connecticut Avenue, N.W.
Washington, D.C. 20006

Dear Mr. Epstein,

We have just received a microfiche which may be of interest to you and your associates. I am enclosing the bibliographic information and table of contents for the Proceedings of the National Workshop on Substitutes for Asbestos held in Arlington, Va., on July 14-16, 1980.

Could you please advise which sections are of interest to you? We can, of course, provide copies from the microfiche, if you wish.

The first quarterly report on health effects of aluminum compounds in mammals, 1982, was mailed to you yesterday afternoon. Thank you for sending the criticisms of the 1980 and 1981 reports. We are getting to work on them immediately.

Sincerely yours,

Geraldine L. Krueger
Senior Research Associate

BIBLIOGRAPHIC INFORMATION

PB81-176778

Proceedings of the National Workshop on Substitutes for
Asbestos Held at Arlington, VA., on July 14-16, 1980,

Nov 80

Arlene Levin.

PERFORMER: Environmental Protection Agency, Washington, DC.
Office of Pesticides and Toxic Substances.
EPA-560/3-80-001

SPONSOR: Consumer Product Safety Commission, Washington,
DC.

Sponsored in part by Consumer Product Safety Commission,
Washington, DC., and Interagency Regulatory Liaison Group,
Washington, DC.

The purpose of the National Workshop on Substitutes for
Asbestos was to obtain more information on the technical and
economic feasibility and possible health problems of
substitutes for asbestos, for use in considering regulation
of asbestos. Some of the topics discussed include:
Non-asbestos friction materials; Discussion on friction
products; Gaskets and packings; Asbestos in plastics;
Discussion on plastics and flooring; Single-ply roofing as a
substitute for asbestos roofing felt; Mill applied coatings
for underground pipelines; Discussion on pipeline wrap;
Discussion on textiles; Asbestos substitutes in roof
coatings, sealants, and cements; Substitutes for
asbestos-cement sheet; Inhalation, deposition, and clearance
of particles; Man-made vitreous fibers and health; Discussion
on the translocation and fate of sized man-made mineral
fibers; Exposures to mineral wool; Toxicology, aspects,
KEYWORDS: *Asbestos, *Meetings, *Synthetic fibers, *Glass
fibers, *Carbon fibers, *Ceramic fibers, *Fibers,
*Industrial hygiene, *Occupational safety and
health.

CONTENTS

Acknowledgments	viii
Introductory Remarks, Richard J. Guimond	1
Overview of Regulatory Status, Peter Preuss and Warren Muir	3
ECONOMIC SESSIONS: Richard J. Guimond, Chairman	
WORK SESSION ON FRICTION PRODUCTS	
Non-Asbestos Friction Materials, Michael G. Jacko, Charles M. Brumhofer, and P. William Aldrich	9
Discussion on Friction Products	32
WORK SESSION ON GASKETS AND PACKINGS	
Gaskets and Packings, Stephen D. Kowhler	35
Discussion on Gaskets and Packings	58
WORK SESSION ON PLASTICS AND FLOORING	
Asbestos in Plastics: Looking for Alternatives, Matthew Naitove	59
Discussion on Plastics and Flooring	69
WORK SESSION ON PAPER AND ROOFING PRODUCTS	
Single-Fly Roofing as a Substitute for Asbestos Roofing Felt, David E. Bailie	71
Roofing Felt, Nancy Roy	75
Discussion on Roofing Products	82
Mill Applied Coatings for Underground Pipelines, Jack Wink	84
Discussion on Pipeline Wrap	99
WORK SESSION ON TEXTILES	
Textiles, Samuel G. Manfer	101
Discussion on Textiles	106
WORK SESSION ON SEALANTS	
Asbestos Substitutes in Roof Coatings, Kenneth Brzezowski	109
Overview of Asbestos Substitutes in Sealants, Roof Coatings, and Cements, Eric Wormser	113
Discussion on Sealants	119
WORK SESSION ON SUBSTITUTES FOR ASBESTOS-CEMENT SHEET	
Glass Fiber Reinforced Cement, John Jones and Frank W. Pekala	121
Other Substitutes for Asbestos-Cement Sheet, David Cogley	129
Discussion on Substitutes for Asbestos-Cement Sheet	135

WORK SESSION ON SUBSTITUTES FOR ASBESTOS-CEMENT PIPE	
Substitutes for Asbestos-Cement Pipe, Richard A. Simonds and James L. Warden	139
Discussion on Substitutes for Asbestos-Cement Pipe	161
PANEL ON DEVELOPMENT OF SUBSTITUTES	
Presentations by Richard J. Guimond, Robert Moore, John Gurtowski, Roy Steinforth, James P. Reis, and Barry Castleman	163
Discussion on Development of Substitutes	175
ROUNDTABLE DISCUSSION SESSIONS	
Introductory Material to Roundtable Discussion Sessions	181
Summaries of Roundtable Discussions	194
PRODUCT AND SUBSTITUTE MATERIAL REVIEW SESSION	229
HEALTH SESSIONS: James N. Rowe, Ph.D., Chairman	
Scope of the Health Workshop, James N. Rowe	279
OVERVIEW OF THE ROUTES OF EXPOSURE	
Inhalation, Deposition, and Clearance of Particles, Morton Lippmann	283
Fate of Ingested Particulates, James Millatte and M. Rosenthal	313
Discussion on the Routes of Exposure	323
SYNTHETIC FIBROUS SUBSTITUTES	
Man-Made Vitreous Fibers and Health, Jon L. Konzen	329
Discussion on Man-Made Vitreous Fibers	342
The Translocation and Fate of Sized Man-Made Mineral Fibers Following Exposure by Intratracheal Instillation in Rats, David M. Bernstein, Robert T. Drew, and Marvin Kuschner	343
Discussion on the Translocation and Fate of Sized Man-Made Mineral Fibers	391
Occupational Exposures to Mineral Wool, Douglas P. Fowler	395
Discussion on Mineral Wool	418
Mortality Patterns of Rock and Slag Mineral Wool Production Workers, Cynthia F. Robinson, Gregory O. Ness, Richard J. Maxwell, and John M. Dement	419
Discussion on Rock and Slag Mineral Wool	420
Industrial Hygiene and Toxicology Aspects of IM Nextel [®] 312 Ceramic Fibers, Robert S. Larsen and William McCormick	425
Discussion on Ceramic Fibers	441
Toxicology of Aramid Fibers, C. F. Reinhardt	443
Discussion on Aramid Fibers	448
Environmental Exposure Considerations Due to the Release of Graphite Fibers During Aircraft Fires, Benjamin Suscholtz	451
Discussion on Graphite Fibers	474

NATURAL FIBROUS SUBSTITUTES

Cross-Sectional Medical Study of Wollastonite Workers, Brian Boehlecke, D. M. Shasby, M. R. Petersen, T. K. Hodous, and J. A. Merchant	475
Discussion on Wollastonite	476
Endemic Pleural Disease in Relation to Zeolite Exposure, Arthur M. Rohl	477
Discussion on Zeolites in Turkey	482
Chemical Detoxification of Asbestos Fibers, Earl S. Flowers	489
Discussion on Chemical Detoxification of Asbestos Fibers	497

NATURAL NON-FIBROUS SUBSTITUTES

Health Considerations in the Perlite Industry, W. Clark Cooper	505
Discussion on Perlite	511
Review of the Health Effects of Micas, Ilmar Lusia	513
Discussion on Mica	554
Health Effects of Vermiculite, James E. Lockey and Stuart M. Brooks	555
Discussion on Vermiculite	560

Talc: Roundtable Discussion (Evening Session)

Opening Remarks: Natural Non-Fibrous Substitutes: Talc, Arthur M. Langer	563
Cross-Sectional Epidemiologic and Industrial Hygiene Survey of Talc Workers Mining Ore from Montana, Texas, and North Carolina, John Gamble, Alice Greife, and John Hancock	570
Roundtable Discussion on Talc	612

SYNTHETIC NON-FIBROUS SUBSTITUTES

Occupational Exposures in the Manufacture and Application of Polyurethane and Urea Formaldehyde Insulation Systems, Robert F. Herrick, A. A. Alcarese, R. P. Reisdorf, and D. W. Rumsey	621
Discussion on Foams	644
Human Pulmonary Function Study (5 years) on Occupational Isocyanate Exposure, Hans Weill	647
Discussion on Isocyanate	652

CRITERIA FOR EVALUATING SUBSTITUTES

Criteria for Animal, Tissue Culture, and Biochemical Studies on Asbestos, Mineral Dusts, and Proposed Substitutes for Asbestos, Earl S. Flowers	653
