**Subject:** Re: WATER FILTER INTRODUCTION\_EPA Hurricane Maria Update for September 22, 2017

Hi,

Thank you for your email.

As a concerned habitant of this Earth, I find it my duty to pass-on any information that might worthwhile in the effort to aid of my fellow human family in need.

Mr. Haslem has designed, created and patented a dual input Water Filter, specifically for the rugged outdoors, home, hospitals and fields. All that is needed are, carbon filters and a source of water; pond, lake, faucet with a hose. Please see image chart below.

Attached you will find, a chart of the Filter, and a specification document with the inventor's contact information.

Hope this will be of some help in the effort to assist in this time of human disaster.

Best Regards,

Jivanii

## SPECIFICATIONS

### ACRYLIC CONSTRUCTION

Weight: 11 Lbs.

Height: 20" Length: 20" Width: 8"

Water under pressure flow rate approximately: One Gallon per minute

Manual pump flow rate, approximately: Half gallon per minute

All materials NSF-ANSI Standard 42 compliant for material requirements

### WARRANTY

Limited Warranty of two (2) years. Warranty guarantees free repair, or replacement for any defects related to manufacture.

### TO PLACE AN ORDER

Capolani  
1748 SW 7th Avenue  
Pompano Beach,  
Florida 33060  
U.S.A.

### PRICE

\$395.00 US

F.O.B. Miami, Florida

### CONTACT

Tel: 954-675-3301

Email:  Ex. 6

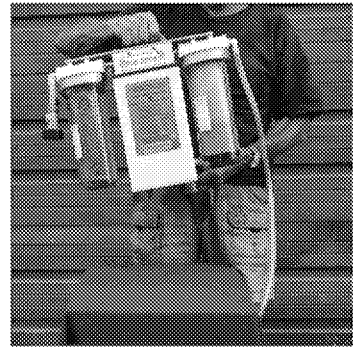

**NOTICE:** Because of the massive epidemic with fraudulent credit cards, the only method of payment that we accept is money order.

**The CAPOLANI SURVIVALIST PORTABLE WATER FILTER  
MANUFACTURED IN THE U.S.A. AND SOLD ONLY IN THE USA**

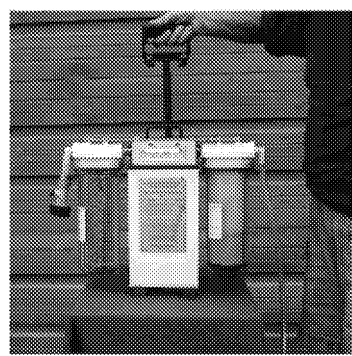

**The**  
**CAPOLANI SURVIVALIST**  
**PORTABLE WATER FILTER**  
 MADE IN U.S.A. U.S. Pat.D723135 S

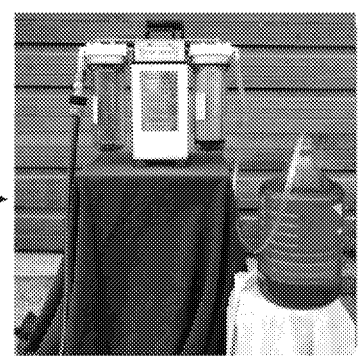

**6.** Filtered Water Collected At Output

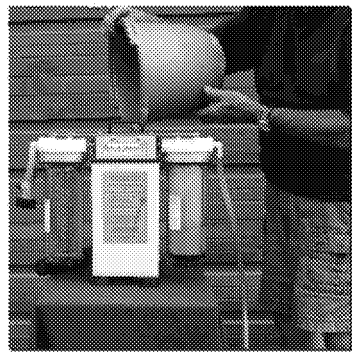

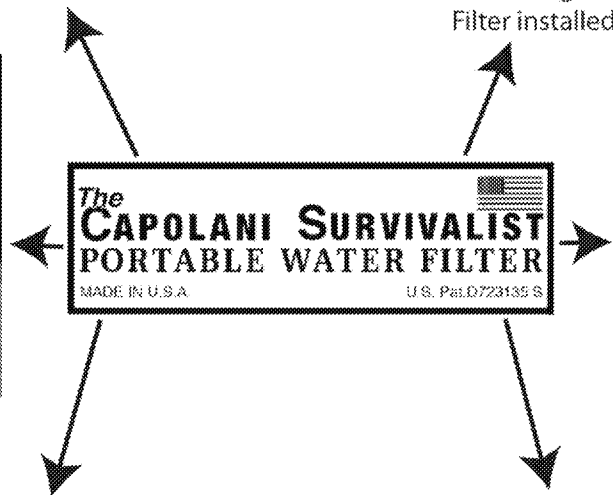

**1.** Capolani Portable Water Filter Weighs 11Lbs. Without Filter installed

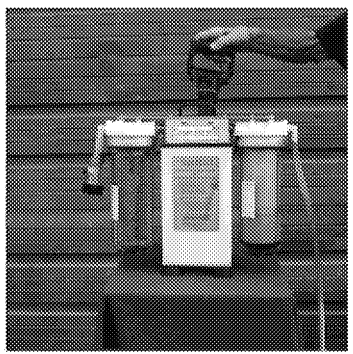

**5.** Retrack Pump And Pump Unfiltered Water Through Filter

**2.** Pressurized Water Input Via Garden Hose Collected At Output

**4.** Fill Holding Tank With Water From Pond, Lake, Stream, Etc.

**3.** No Pressurized Water ie. Power Failure etc. Remove Pump Handle

### **EPA Hurricane Maria Update for September 22, 2017**

WASHINGTON (September 22, 2017) – U.S. Environmental Protection Agency (EPA) continues to coordinate closely with federal, commonwealth, territory and local partners as the Agency responds to the impact of Hurricane Maria. EPA is supporting the Federal Emergency Management Agency (FEMA) through its assistance to the governments of Puerto Rico and the U.S. Virgin Islands. EPA is focused on environmental impacts and potential threats to people's health caused by Hurricane Maria, as well as the safety of those in the affected areas.

About 80 personnel are currently involved in hurricane efforts. The following EPA teams of On Scene Coordinators, scientists, technical assistance professionals and other first responders are deploying to Puerto Rico and the U.S. Virgin Islands this weekend, once conditions are safe to travel, to assess conditions in the aftermath of Hurricane Maria:

- Water Sampling
- Hazardous Materials Assessment
- Drinking Water and Wastewater Facilities Assessment
- Regulated Facility Assessment

EPA has important resources available online in English and Spanish about floodwaters, hazardous debris, household hazardous waste, and other hurricane impacts. EPA will continue to provide regular updates about EPA's response to Hurricane Maria. For information and updates, visit: [www.epa.gov/hurricane-maria](http://www.epa.gov/hurricane-maria).
