EMPLOYEE RELATIONS DEPARTMENT

File: C-02177
Exhibit No. 25
on the examination of
Paul J. Reinhardt
October 18, 1966
PAUL J. REINHARDT
SPRINGFIELD
ONTARIO

TO: J. A. ZAPP
G. J. STOPPS, M. D.
C. F. REINHARDT, M. D.
W. E. NEELD, JR., M. D.
S. PELL

FROM: C. A. D'ALONZO, M. D.

I called Dr. Joseph Tomashefski, Associate Professor of Preventive Medicine, Ohio State University. He is the physician who did the pulmonary function testing in the various cities of Ohio.

Dr. Tomashefski told me that in any plant doing less than several hundred pulmonary function tests a day, the Pulmonor (Jones), which Dr. Neeld has already ordered, is the best instrument. The Wedge Spirometer costs over \$1500, but is capable of being analysed by an analog computer, and is the one to be considered if more than several hundred tests are done on any location daily. Dr. Tomashefski advised, after I told him what we had in mind, that we consider the Pulmonor instrument.

Dr. Tomashefski, of course, knows Dr. Reinhardt. We agreed that Dr. Reinhardt should spend a day or so in his laboratory to get a feeling of this undertaking for us, by pre-arrangement, of course, and sometime in the near future.

Dr. Tomashefski also advised that anytime in the future he could be of service, he would be most willing and anxious to do so. I promised to call him in consultation if and when the occasion arose.

Dr. Tomashefski also suggested that after Bill Neeld acquires his machine, and should questions arise, he would be pleased to hear from him directly.
