Dear Mr. Werner:

For your information we are pleased to send you some documentation from our library.

We are also enclosing inserts for "Reference book on research of biological effects of asbestos" bringing Volume III up-to-date. The inserts should be put into the appropriate compartment of the book (AI-DIII) on top of the ones which are already present there. However, chronological order should be checked for new inserts describing older publications.

Should you need additional copies, we will be pleased to supply you with the quantity required.

Sincerely yours,

Premysl V. Pelnar, M.D.
Scientific Secretary
