Biological Effects of Asbestos

I am sending herewith two copies of the Annals of the New York Academy of Sciences containing the papers given at Dr. Selikoff's conference in New York in October 1964. I thought you would like one for the Asbestos House files and that you might like to circulate the other to Unit Companies, in case their Libraries have not already acquired copies.

It looks a daunting weight of reading but I think you will find that the papers that are of most direct interest to us are surprisingly readable. You will notice many British contributions, including those from the A.R.C. - by Dr. R. Gaze, Dr. P.F. Holt, Dr. J.M.G. Davis, Dr. W.J. Smither, Dr. S. Holmes, Dr. C.G. Addingley, Mr. D.W. Hills and Dr. J.F. Knox. You will also see many papers, including that by Dr. Muriel Newhouse, which have subsequently achieved greater notoriety or at least publicity.

John Waddell
