21st November, 60.

Dr. J. McNulty,
Chest Physician,
Kalgoorlie District Hospital,
KALGOORLIE.

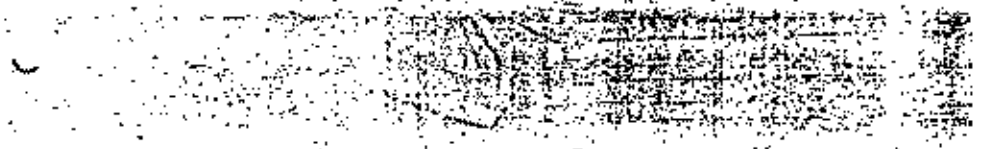

Dear Dr. McNulty,

Thanks for the report on the recent x-ray examinations at Wittenoom. I have discussed it with the State Mining Engineer and as a result of same we will press for the further improvement of conditions both in the mine and the mill. We also propose to make a careful study of the industrial history of all employees at the next medical examination.

I agree with you that effective dust supression at Wittenoom is an urgent and immediate necessity.

Yours faithfully,

UNDER SECRETARY FOR MINES
