Could you arrange for David Schalk to get a copy of the
cited study for us?

Paul -- do you have this study:

Keplinger, M.L., O.E. Fancher, & J.C. Calandra (1971)
Toxicologic studies with polychlorinated biphenyls.
Toxico. Appl. Pharmacol. 19:402-403.

If you don't, you might want to get it. It certainly looks from the authors like published IBT studies on PCBs. If so, it looks further like Monsanto et al intended the world -- and Nevada Power -- to rely on those studies.

Please send me the list of defendants' experts, so I can see what we've got here.
