

INTER-OFFICE MEMORANDUM

2/25

cc: Wool Plant Supervisors
From: W.S. Troutvatter
Subject: Type D C/F

Date: February 24, 1972

000290

As of this date, February 24th, 1972, all Type D C/F manufactured in our plant MUST BE COMPLETELY asbestos free.

In order that we can assure sales of producing a non-contaminated D C/F, all types of CAFCO requiring asbestos, will be scheduled and produced at the end of the work week.

The schedule should be worked out to allow for the manufacture of CAFCO requiring asbestos until week end shut-down occurs. Following the week end shut-down, the clean up crew will purge the entire system, including the binder auger, with wool. Where practical, covers must be removed and augers cleaned.
