Subject: Position paper for hearing on the EU F-gas regulation
Attachments: 2021-05 RefNat Position Paper_F-Gas Review.pdf

Dear [REDACTED]
on behalf of the RefNat's Association we like to provide you with our position paper for tomorrow's hearing on the F-gas Regulation. We have also submitted our paper to the consultants as our Association's input.

The RefNat Association is a global non-profit initiative engaged in promoting natural, climate-friendly alternatives in refrigeration, air-conditioning and heat pump technologies. The association is supported by the following members from five EU member states:

STEK, ECOS - Environmental Coalition on Standards, KNVvK Young Cool, HEAT GmbH, Deutsche Umwelthilfe, Bundesinnungsverband des Deutschen Kälteanlagenbauerhandwerks, itho daalderop, Agrobio, ENTROPY Cooling Solutions, SEAE- Sociedad Española de Agricultura Ecológica, Triple Acqua Licensing Ltd
and individual innovators from the RACHP sector.

As tomorrow's meeting will very likely leave a lot of room for exchange, we would be very willing explaining you our position in follow up meeting in further detail.
We are looking forward to hearing from you.

Best regards,

[REDACTED]
