

Everyone of these v-belt sizes

can be replaced with 4 reels of Veelos

No matter how big your present V-belt inventory, you can drastically cut it with just 4 reels of Veelos. These handy reels give you a choice of more than 316 sizes in O, A, B and C widths. If you use only A and B sizes, just 2 reels of Veelos will provide you with a complete V-belt inventory. Any length belt is quickly uncoupled from a reel, made endless, then installed.

As soon as you specify Veelos on reels, you can stop stocking matched sets of endless belts. You can forget belt deterioration and obsolescence. Veelos on reels saves storage space ... simplifies inventory records.

Veelos goes on fast ... lowers machine downtime. On drives with outboard bearings it is installed without moving the motor or dismantling the machine. Veelos is made in all standard sizes ... fits all standard grooves ... is available in 100 foot reels. Sales engineers in principal cities; over 300 distributors throughout the country.

New Veelos Catalog ... Now Veelos on reels makes big V-belt inventories little is just one of the many features in the new Veelos catalog. All the facts and full engineering data are given. Write for your copy today.

I KEEP OUT

DIRT  
and  
WATER

"I am De Laval Centrifugal Force. When I am put to work to purify lubricating oil — either turbine lube or Diesel lube — I do more than just remove the dirt present in the oil. I take out water, too!"

That's where De Laval Centrifugal Force differs from other means of maintaining lubricating oil. It does its job *completely* — the protection it affords against trouble from impurities remaining in lubricating oil is *complete* protection. No half-way measures for De Laval Centrifugal Force — the water is discharged continuously after being centrifuged out, and the dirt is stored outside of the zone where purification takes place.

De Laval Oil Purifiers have another advantage — enough reserve capacity to take care of a sudden emergency, such as a surge of water due to a leak.
