April 21, 1927

Dr. Homer L. Sampson, Roentgenographer,
Trudeau Sanitarium,
Saranac Lake, New York.

Dear Doctor Sampson:

I would like very much to know if it would be agreeable to you to have Dr. Sayers, Chief Surgeon of the U. S. Bureau of Mines, and myself visit you on the 28th of this month.

The Metropolitan has recently entered into a contract with the Bureau of Mines to conduct a silicosis and tuberculosis clinic in the lead and zinc mining district in Ottawa County, Oklahoma. Last Tuesday we had a conference with Dr. Coolidge at Schenectady and he also strongly advised us to discuss the question of technique with you. The fundamental point at issue is securing comparable films in order that we may, if possible, get some definite information in regard to the progress of silicosis.

With best regards, I am,

Sincerely yours,

A. J. Lanza, M.D.
Assistant Medical Director.
