

Three distinct types of **ELECTROLYTIC WHITE LEAD**

ANACONDA

supplies them all

The flexibility of the electrolytic process permits making a variety of types of white lead.

Anaconda high oil absorption type is a more basic type white lead. Higher in tinting strength than ordinary white leads, it offers interesting possibilities to manufacturers of the newer flowing type of house paints.

Anaconda medium oil absorption type meets the need for a dependable all-purpose paint pigment.

Anaconda low oil absorption type is particularly well adapted to paste paints, or wherever low oil absorption is of advantage.
