Subject: Fw: Shanghai Health Study - Conference call, Monday, January 29 at 10 AM EST

I was able to speak with Richard Irons (he is presently at Colorado rather than China which explains my inability to reach him last week) and covered the needs of the Consortium. He readily agreed to the call on Monday. He did confirm that Cinpathogen is the Company - now named - which is mentioned in the business plan, and will describe its relationship to the International Clinical and Molecular Research Center (ICMRC) at IBS / Fudan and the ongoing involvement with Colorado.
Look forward to clarification on Monday.
Michael

[I think it might be help to note that the Cinpathogen / ICMRC @IBS / Fudan appears to parallel to other organizational set ups with which I am familiar and which work well e.g. Dr Albertini at the University of Vermont 's Institute of Molecular Epidemiology and the associated private company BioMosaics through which the ACC butadiene Czech study is conducted)]
