INTRODUCTION

This index has been developed by the Library of the National Safety Council to provide historical information on the Occupational Safety & Health Data Sheets, formerly known as the Industrial Data Sheets. The index lists all published data sheets up to the year 1996.

Frequently people ask the question, "How far back in years does a data sheet go?" This index provides the answer. A typical entry will give the following:

- Data sheet number
- Title
- Publishing history (rev. = revised, reaf. = reaffirmed, rep.= reprint)
- Pages
- If the data sheet was derived from another Council publication.

This book is divided into two parts. The first part is an alphabetical list, arranged by title, of the data sheets. The second part lists the entry for each data sheet, arranged by data sheet number.

Copies of all data sheets are available from the Library. Please call for photocopying fees (630-285-1121, ext. 2199)
