first used, and last used, and identify and produce a copy of said warning or caution.

Ford's response was vehicles are not shipped in containers, packages or boxes. After-market brake linings and clutch facings are shipped in cartons to authorized distributors.

Labels on the after-market product containers, beginning in 1980, read along lines such as, "Caution, contains asbestos fibers, avoid creating dust. Breathing asbestos dust may cause serious bodily harm.

"When servicing this brake lining, or any other component related to it or located near it, prevent asbestos dust from being airborne by vacuuming this assembly with an industrial-type vacuum cleaner, equipped with a high efficiency filter system, and by washing the assembly with an appropriate brake parts washer, if necessary.

"Never remove dust or dirt from this assembly by blowing with compressed air."

Thank you, Your Honor.
