VISTA

I believe we have far more medical, toxicology, and epidemiology studies on file than you have listed. We should review what we have on file, specifically the information recently generated during the VCM 8(c) investigation.

As to MSDS's we should have 3 basic MSDS types. Two Conoco ones (one 2-page and one 4-page) and at least one Vista four page MSDS. Let me know if this is the case.

Minor typos are present on MSDS 3 and SOF2.
