A QUALITY PRODUCT . . .

BUILT TO LAST A LIFETIME

The words "Simplified Soldering" now have a real meaning. With the new Peerless Electric Soldering Machine, all kinds of soldering jobs can be done quickly, safely and easily. The Peerless is of entirely new design, with all necessary attachments, in a small, compact, sturdy machine. One of its outstanding features is the "Dial-Heat" regulator. You turn the dial indicator just as you would your radio to get the heat you want. Heats are numbered on the dial and grow progressively hotter from 1 to 10, for soldering of every kind from soft soldering, baby rings, etc., to silver spoons and ladles, men's heavy rings, etc. Ten different heats for simple, selective heating just by turning the indicator.

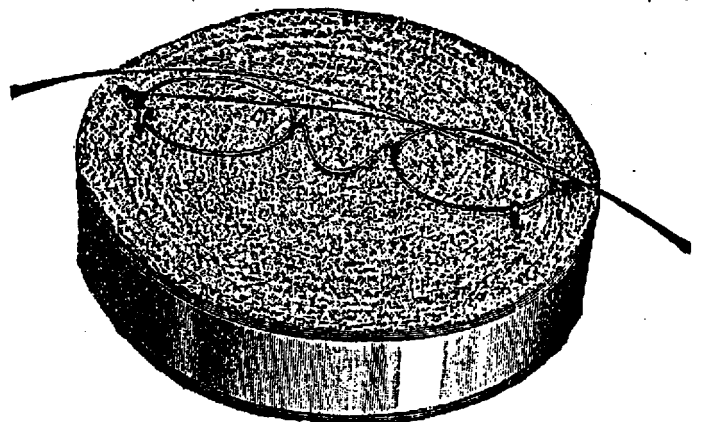

Come complete with foot control, round tapered carbon, round beveled carbon, contact cord and clip, cord and plug. Ready to plug into any electric outlet and use. Book of illustrated instructions included. Machine is encased in metal covering, black crackle finish. Clip carbon holder, etc., are nickel plated. For 110-120 volt, 50-60 cycle. A.C.

424M1. Soldering Machine. Each.....\$32.75

CHEMICALLY PREPARED CHARCOAL SOLDERING BLOCKS

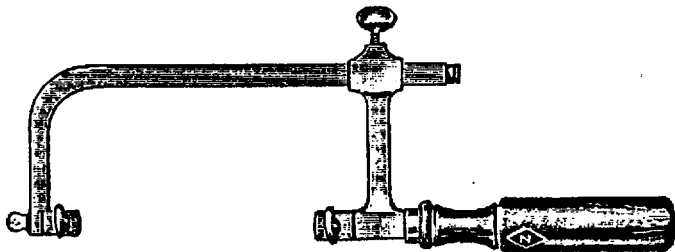

- No. M41895. 2 1/2 x 3 1/4 inches. Each.....\$0.70
