Hardware Periodicals

Try the Library of Congress and look through these journals carefully for anything about the hazards of asbestos products. Including news reports (about government regulations, etc.), articles about hazards of hardware products from any standpoint (liability, insurance, consumer issues, etc.), editorials, Anything. The goal is to discover if the hardware industry trade journals were carrying information about asbestos hazards from the 1960s-1980.

WASHINGTON

NEWS

for WESTERNERS

ALPH W. CROSBY

News Bureau, Washington, D. C.

Government Tax Crackdown Billions of Dollars

Westerners should keep an eye on the federal government's tax crackdown. All three branches of the government, executive, legislative and judicial, are gunning for tax evaders.

What's at stake? Billions of dollars in lost revenues!

The House Ways and Means Committee was set for a crackdown when the government is losing \$1 billion a year in taxes from the unreported income of independent business. A Rutgers University study told committeemen that the self-employed report only 75 percent of each dollar earned. The Internal Revenue Service is now underway against taxpayers who deliberately skip income and dividend payments in their income tax returns. The loss is up to a billion dollars in tax revenues lost this year. Agents have already filed up 200 cases of this type of evasion.

Congress is studying legislation to require the withholding of income taxes at the source on interest and dividend payments. The U. S. Tax Court gave a shot of new life to another IRS drive. The court ruled to cut down corporate deductions for yachts, hunting lodges and clubs.

Congress also studies a bill to allow deductions on yachts; on houses; night club, theater and sporting event entertainment; dues or initiation fees in social organizations; and

traveling expenses to conventions outside of the U. S.

More to the point on the tax crackdown:

* Tentative approval has been given for funds to hire 900 new federal tax agents.

* President Eisenhower has asked Congress to approve money for an electronic computing system to keep its mechanical eye on taxpayers' accounts.

* * *

BUILDING MATERIALS will join autos, steel and drugs as subject of the Senate investigating eye. . . . Senate Antitrust and Monopoly Subcommittee, headed by Sen. Estes Kefauver, D., Tenn., plans to launch an inquiry into the "high prices" of building materials. . . . Probe will center on the pricing of such products as glass, plumbing fixtures, asbestos and gypsum. . . . Kefauver is blaming the predicted decline in new housing starts on high prices of building materials. . . . Though chances are no legislation will stem from the inquiry, the industry is bound to suffer from bad publicity.

* * *

MAIL ORDER business in lethal weapons is coming under congressional scrutiny, also. Rep. William S. Moorhead, D.,

Pa., has introduced legislation intended to make it more difficult for criminals to obtain firearms. . . . Moorhead said the legislative package provides for: checking the flow of mail order revolvers, more comprehensive registration, and more information for police on shipments to their communities. . . . Moorhead wants firearms sold in hardware stores where police can check records.

* * *

WESTERN BUSINESSMEN are opposing a national finance charge disclosure bill sponsored by Sen. Douglas, D., Ill. . . . It would require all credit charges, interest, service fees to be explained to a purchaser in writing. . . . Douglas bill would require statement of total finance charge and percentage it bears to unpaid balance in terms of simple annual interest. . . . Opponents argue finance and installment control is a state function.

* * *

WESTERN DEVELOPMENT substantially contributed to by the Bureau of Reclamation in fiscal 1959, Secretary of the Interior Fred A. Seaton reports. . . . Annual report shows construction was completed on three water storage dams, three diversion dams, 410 miles of canals, pipelines, laterals, and drains. . . . Irrigation facilities were completed to serve 199,471 acres of land, and 45,450 kilowatts of installed hydroelectric generating capacity were added in the West. . . . Seaton says 465 separate construction, material, equipment and supply contracts were awarded.
