Which?

Dr. Robert A. Kehoe,
Netteling Laboratory in the Department
of Preventive Medicine & Public Health,
College of Medicine,
University of Cincinnati,
Cincinnati, Ohio, U.S.A.

11 January 1966

Dear Dr. Kehoe,

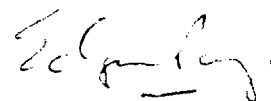

Thank you very much for your letter dated 29 December 1965 and for the published information which we received under separate cover.

It was very kind of you to answer my questions at length. The information you have given us will be very helpful and I shall place the published material in our library for permanent use.

I am enclosing the following copies of Which? containing reports on products we have found to contain undesirable quantities of lead:

January 1963	Drop Side Cots	F.13
November 1963	Toy Wheelbarrows	F.337
November 1964	Constructional Toys for Young Children	F.336
January 1966	Lead in Frying Pans	F.29.

Yours sincerely,

Edgar Page
Project Officer
