Mr. Jesse Lieberman
Regional Industrial Hygienist
Code 725, Branch Clinic
Philadelphia Naval Shipyard
Broad and Rowan
Philadelphia, Pennsylvania 19112

Dear Sir:

(1) (2)

In response to your request for toxicity and handling information on Chlorodiphenyl (42% chlorine), I am enclosing a Toxicity Information Sheet on Monsanto's AROCLOR 1016. This material has the lowest chlorine content of the currently available aroclors. It does, however, demonstrate the toxicity and handling precautions associated with all such PCB materials.

If you have questions on disposal I suggest you contact J. C. Weber at telephone (314) 694-2027 at this address.

Sincerely,

Steve

S. A. Roberts
Senior Industrial Hygienist
