

Negative Exposure Assessment

Gasket Removal

Introduction

The following is a negative exposure assessment for the removal of asbestos-containing gaskets under the non-glove bag procedure. This negative assessment is based on data obtained during like jobs performed by maintenance person.

"closely resembling"

The major workplace conditions which have contributed to the levels of historic asbestos exposure, are no more protective than conditions of the current workplace.

Current asbestos gasket removal jobs are being done using the same basic procedures as was used in earlier jobs. The procedure

"Type of Materials Involved"

The type of material being removed is a bonded material which is non-friable in manufactured state.
