Medical Department
Bureau of Workmen's Compensation
Columbus, Ohio

Gentlemen:

RE: OD 6510-22 Larson Phillips

On November 27, 1956, a visit was made to the Cleveland Chevrolet Division of General Motors Corporation, Stumpf and Brookpark Roads, Cleveland, Ohio, to check the conditions under which the above claimant had worked. This company manufactures Chevrolet transmissions and stampings.

The claimant started to work for this company on July 23, 1951 and is still working. He was off from April 6, 1956 to April 23, 1956 because of illness alleged in his application. His job was that of a job setter for grinding, hobbing and drilling operations. He worked in department 41 of this company, which department occupies an area of approximately 100' x 110' in a large building. All grinding in this department is done wet; that is, they use a coolant. Wherever possible, the grinding operations are enclosed. In some cases the operations are enclosed and exhausted so as to eliminate oil mists from the room.

There is no apparent source of dust containing free silica to which the claimant was exposed. It is believed that claimant's exposure to dust would have no industrial hygiene significance.

Very truly yours,

Dewitt H. Fenn,
Industrial Hygiene Engineer

Mr. George D. Clayton,
Executive Secretary
American Industrial Hygiene Association,
14125 Prevoet,
Detroit 27,
Michigan

Dear Mr. Clayton:

Dr. S. R. DeMister, plant physician at the Cleveland Chevrolet Division, General Motors Corporation, Stampf and Brookpark Roads, Cleveland, has expressed interest in becoming a member of our Association, and he has suggested that I provide him with an application for membership.

Will you kindly see that he receives an application?

Very truly yours,

dh:gw

DeWitt Huffman
