8-PIECE PROFAX® HOT TOP SET FLUSH WITH MOLD TOP

INSTALLATION:

8-piece Profax Hot Top set flush with mold top.

SUSPENSION MEMBERS:

FA-302 style attached hangers are the sole suspension members necessary to hold the individual boards while setting the corner posts. They are stapled to the Profax, fold flat for shipment and are merely swung out to engage the top of the mold. They are available for any fixed setting height and eliminate the need for a setting fixture for 8-piece Profax Hot Tops.

RETENTION MEMBERS:

The only retention members required for the nominal 8-piece installation are the Profax Corner Posts. Due to their tapered edges and mating angles with adjacent boards, they lock in place when wedged into position.
