Barry Castleman, Sc.D. environmental consultant

February 14, 1990

Dear Scott,

I have examined Paul Edholm's shipment of documents of boiler periodicals, and find the Dec. 1936 article on Drinker and dust hazards (Boiler Maker + Plate Fabricator) most interesting. & just dispatched Paul to obtain for us complete copies of that month's issue of the magazine, to see what notice to specific manufacturers of boiler insulation can be inferred.

Steam Plant Engineering (Feb, 1932) referred to a meeting of the "American Boiler Mfgrs. Assn." The minutes of trade groups like this have been very useful, and I suggest that your efforts include investigating what trade associations have existed in this industry and what minutes of their meetings & other records of their activities (formation of a health + safety committee, etc.) exist.

I am still trying to get a satisfactory answer from Paul Edholm as to what abstracting publications existed in the boiler/power industry.

Sincerely,

Barry
