**Subject:** Superfund sites

The people of Texas and United States demand to know **what chemicals** are at these affected Superfund sites. Please put out this info asap. We also demand info on these companies policies regarding emergencies.

We expect a review and change to regulations. And no, we are not buying the idea that planning and preparation are "job killing regulations". We've all seen what lack of regulations can do. It's horrific.

You will need to answer to the public on all these issues.

My concern with Scott Pruitt all along has been his care for businesses over the environment or people. Now we see this is a real concern. The country is watching him and the EPA closely.

Sam Chasen
