Several of the latest type corrosion inhibitive paint formulations for the protection of iron and steel exposed to marine conditions are included in Red Lead Technical Letter No. 4, just published by the Lead Industries Association.

Complete detailed formulations of high performance synthetic vehicle paints are presented for marine atmospheres, intermittent salt water immersion and continuous salt water submersion.

This is one of a series of Technical Letters issued to acquaint manufacturers, specifiers and users of paints with the latest developments in metal protective coatings. Copies of this twelve page booklet can be obtained without charge by writing to the Lead Industries Association, 420 Lexington Ave., New York 17, New York.
