

E. V. John - World Headquarters

February 10, 1971

Mr. Wayne W. Withers - WWITH  
Mr. William B. Papageorge - WPAW

Mr. Michael A. Blatz - MBLAT

Attached is the Q&A you requested regarding PCBs which might come up at the pollution conference on February 23 or 24. These questions go beyond those related strictly to the plant, which Mr. Lipe is capable of handling from his own knowledge.

As we discussed, there are literally hundreds of questions that could be asked, but I think it will come off better if Lipe does not try to be an expert on PCB, but only have a general knowledge of the subject. I am enclosing our July 16 news release which will familiarize him with our general control program.

Please carbon me in on the final conference copy, Q&A, etc. for review by Organic people.

E. V. John
