consciously respond to this awakening and it is strange that they do not. The results are so gratifying where comparisons have been made year after year to measure the results. This is a united effort "to make every community, as clean as its cleanest home."

Working people respond in good results to better, cleaner surroundings in office and factory. To join your neighbors in an effort to clean up a neighborhood develops a desire to keep it clean. Marked gains have come through efforts made in the schools. Splendid work has been done in Americanization by teaching respect for common property.

Health conditions can be and are improved. I can't tell it all. Really, the measure of advantage that comes from such a campaign is shown in actually improved living conditions, through awakened consciousness, an aroused sense of civic responsibility, and the neighborly meeting of mutual problems.

Breeding places for disease are rooted up and destroyed. Mosquitoes, flies, rats, roaches, and other pests are practically obliterated. This campaign saves human lives.
