PECORA ASBESTOS FURNACE CEMENT

The original plastic Asbestos Furnace Cement that has become the standard of the trade. It is a pliable, iron-gray paste, which becomes very hard when heat is applied. It does not become porous, shrink, crumble or crack. At ordinary temperatures, it remains soft and pliable, and "on the bench" or in the can, will be workable till used, especially if covered by a wet cloth. For mounting new or repairing old Furnaces, Heaters, Stoves, etc. For cementing joints smoke and gas tight.
