

**You are invited to a special informational meeting on
The Shanghai Health Study**

*Hosted by The Benzene Health Research Consortium**

Wednesday 10 April
1900-2000
Sala Odescalchi
Park Hotel Villa Grazioli

A consortium of petroleum and chemical companies has joined together to take advantage of a unique set of circumstances existing in Shanghai to conduct meaningful benzene research. The goal of the program is to gain an accurate understanding of the true relationship between benzene exposure and the risk of certain bone marrow diseases. By providing the regulatory and scientific communities with information for more accurate assessment of the risks from exposure to benzene, this study will lead to improved benzene-driven, health-based occupational, ambient air and water regulatory standards worldwide.

Agenda:

1900	Welcome and Introductions Purpose of Meeting	Bill Frick, API
1915	Overview of the Research Program	Myron Harrison, ExxonMobil
1930	Discussion	

*Consortium Members:

- BP
- Chevron Texaco
- CONOCO
- ExxonMobil
- Shell Chemical

and administered by the American Petroleum Institute
