

November 3, 1927.

Dear Mr. Crane:

I have received your letter of November second enclosing a check for \$2500 which is for the lead and calcium studies which are being carried out under the direction of Dr. Joseph C. Aub. I want to express my warm thanks for this check and your continued support of the work Dr. Aub has done, I think with so much profit. I think I may fairly say to you that his work in recent year on lead poisoning, and the relation of lead poisoning to calcium and other minerals in their relation to the glands of internal secretion, has been such as to have established him in a very authoritative position in regard to the whole matter in the minds of other men working in the medical sciences in this country, and I think his work has already lead to very practical and valuable results in the prevention and treatment of lead poisoning, and prospectively may readily lead to still further progress with many things.

Very sincerely yours,

David L. Edsall, M.D., Dean.
