

1981 GOALS FOR TGG

- ① Finalize the audit program and accomplish audits at all plants.
2. Assess the quality control of I.H. sample analysis done at the plants. If indicated, develop a routine quality control program.
- ③ Continue to update education programs and develop new ones where needed.
- ④ Increase the interface with engineering groups at all levels -- plant; Houston; Ponca City.
- ⑤ With others involved, determine the toxicological testing needs for Conoco Chemicals products.
- ?-6. Expedite completion of the revised MSDS's. This can be done by identifying problem areas to date and working to improve them.
- X⑦ On a routine basis, and further as needed; coordinate the medical testing program.
8. Gain further in-depth knowledge of plant operations and products.
- ⑨ Continue technical support to the plants on an as needed basis.
