Hi Cole: This is from IBC.

Hi Bill

I confirmed that Cole Killian, User ID: **Ex. 6** was set up in WTTS today 02/04/25 and has an Active account. we need to confirm when the FPPS security was set up, as this may be because the nightly load has not run and why there is an Access issue.

Please confirm when the FPPS security was set up, then we can look further into the issue.

I confirmed your FPPS account was setup today. You will need to wait until after nightly runs for your additional WTTS.

I will check in with you, tomorrow. Thanks.
